# AGENDA FOR A SPECIAL MEETING OF THE BOARD OF DIRECTORS OF THE VALLECITOS WATER DISTRICT TUESDAY, MAY 10, 2022, AT 5:00 P.M. AT THE DISTRICT OFFICE 201 VALLECITOS DE ORO, SAN MARCOS, CALIFORNIA

CALL TO ORDER - PRESIDENT ELITHARP

#### **NOTICE TO THE PUBLIC**

Meetings of the Board of Directors of the Vallecitos Water District will be held in the Board Room at the District Office located at 201 Vallecitos de Oro, San Marcos, California, on the date and time identified above.

Vallecitos Water District is following the guidance issued by the County of San Diego, effective March 1, 2022, which follows the California Department of Public Health guidance which recommends that persons attending public meetings are strongly recommended to wear a face covering in indoor public settings, whether vaccinated or not. The Department of Industrial Relations also strongly recommends, but does not require, the use of face coverings by all visitors.

BROADCAST OF THE MEETING. Members of the public may watch the meeting live via computer or smart device by going to the District's website: <a href="www.vwd.org/meetings">www.vwd.org/meetings</a> and clicking on the "Watch Live" icon; however, they will not be able to participate in the meeting remotely.

LISTEN TO THE MEETING. Members of the public may listen to the meeting live on their phone by dialing (888) 788-0099 (Toll Free) or (877) 853-5247 (Toll Free). When prompted, enter the meeting ID and Passcode displayed on the District's website.

PLEDGE OF ALLEGIANCE

ROLL CALL

ADDITIONS TO THE AGENDA

Items may be added to the Agenda in accordance with Section 54954.2(b)(2) of the Government Code upon a determination by a majority vote of the Vallecitos Board that an emergency situation exists, as defined in Section 54956.5, or upon a determination by a two-thirds vote of the Board present at the meeting, or, if less than two-thirds of the Board are present, a unanimous vote of Board members present, that there is a need to take immediate action and that the need for action came to the attention of the Vallecitos Water District subsequent to the agenda being posted.

ADOPT AGENDA FOR THE SPECIAL MEETING OF MAY 10, 2022

#### **PUBLIC COMMENT**

Persons wishing to address a matter not on the Agenda may be heard at this time; however, no action will be taken until the matter is placed on a future agenda in accordance with Board policy. Public comments are limited to three minutes. A Request to Speak form is required to be submitted to the Executive Assistant prior to the start of the meeting, if possible. Public comment should start by stating name, address and topic. The Board is not permitted during this time to enter into a dialogue with the speaker.

#### **PRESENTATION**

Fifth grade students from La Costa Meadows Elementary School who participated in the Water Leadership Program will provide a presentation.

#### **CONSENT CALENDAR**

All matters listed under the Consent Calendar are expected to be routine and non-controversial, to be acted upon by the Board by one motion. There will be no separate discussion of these items, unless a Board member or member of the public requests that a particular item(s) be removed from the Consent Calendar, in which case it will be considered separately under Action Items.

- 1.1 APPROVAL OF MINUTES (pp. 5-17)
  - A. REGULAR BOARD MEETING APRIL 20, 2022
  - B. ENGINEERING/EQUIPMENT COMMITTEE MEETING APRIL 26, 2022
  - C. BOARD WORKSHOP MEETING APRIL 27, 2022

Approved minutes become a permanent public record of the District.

**Recommendation:** Approve Minutes

1.2 WARRANT LIST THROUGH MAY 10, 2022 - \$3,890,404.05 (pp. 18-20)

Recommendation: Approve Warrant List

1.3 TASK ORDER AMENDMENT APPROVAL FOR THE MEADOWLARK WATER RECLAMATION FACILITY LANDSCAPING IMPROVEMENTS PROJECT (pp. 21-23)

The existing landscape needs improvements to address the high maintenance, erosion on steeper slopes, and aesthetically inconsistent theme.

Recommendation: Authorize the General Manager to Execute Amendment

No. 1 Under the Current Task Order with NV5

1.4 RESOLUTION FOR DISTRICT CREDIT CARD POLICY UPDATE (pp. 24-27)

The District's credit card policy designates specific staff members' authorization to utilize District credit cards in the course of conducting official District business.

Recommendation: Adopt Resolution

1.5 CONSIDERATION OF ORGANIZATIONAL ACHIEVEMENT AWARDS (pp. 28-29)

The District's Employee Recognition Program recognizes employees for their individual and team contributions in support of the District's Mission and Vision.

Recommendation: Approve Organizational Achievement Awards

\*\*\*\*\*END OF CONSENT CALENDAR\*\*\*\*

#### ACTION ITEM(S)

2.1 ADOPTION OF RESOLUTION OF THE BOARD OF DIRECTORS OF THE VALLECITOS WATER DISTRICT APPROVING ENCINA WASTEWATER AUTHORITY'S FISCAL YEAR 2023 OPERATING AND CAPITAL IMPROVEMENT BUDGET (pp. 30-85)

The Encina Basic Agreement requires unanimous approval of the Encina Wastewater Authority budget by member agencies prior to the budget becoming effective.

Recommendation: Adopt a Resolution Approving the Encina Wastewater

Authority's Fiscal Year 2023 Recommended Operating

and Capital Improvement Budget

2.2 VALLECITOS WATER DISTRICT FISCAL YEAR 2022/2023 BUDGET UPDATE (pp. 86-247)

Staff will provide an update on the budget process to date.

Recommendation: For Information and Discussion Only

\*\*\*\*\*END OF ACTION ITEMS\*\*\*\*\*

#### **REPORTS**

- 3.1 GENERAL MANAGER
- 3.2 DISTRICT LEGAL COUNSEL
- 3.3 SAN DIEGO COUNTY WATER AUTHORITY

- 3.4 ENCINA WASTEWATER AUTHORITY
  - Board of Directors Meeting
  - Capital Improvement Committee
  - Policy and Finance Committee
- 3.5 STANDING COMMITTEES
- 3.6 DIRECTORS REPORTS ON MEETINGS/CONFERENCES/SEMINARS ATTENDED

\*\*\*\*\*END OF REPORTS\*\*\*\*\*

#### **OTHER BUSINESS**

4.1 MEETINGS

San Marcos Chamber of Commerce 8<sup>th</sup> Annual State of the City/Excellence in Business Awards Luncheon – June 8, 2022

- \*\*\*\*\*END OF OTHER BUSINESS\*\*\*\*\*
- 5.1 DIRECTORS COMMENTS/FUTURE AGENDA ITEMS
- \*\*\*\*\*END OF DIRECTORS COMMENTS/FUTURE AGENDA ITEMS\*\*\*\*\*
- 6.1 ADJOURNMENT
- \*\*\*\*\*END OF AGENDA\*\*\*\*\*

If you have any disability which would require accommodation in order to enable you to participate in this meeting, please call the Executive Assistant at 760.744.0460 ext. 261 at least 48 hours prior to the meeting.

Audio and video recordings of all Board meetings are available to the public at the District website www.vwd.org

#### **AFFIDAVIT OF POSTING**

I, Ann Johnson, Executive Assistant of the Vallecitos Water District, hereby certify that I caused the posting of this Agenda in the outside display case at the District office, 201 Vallecitos de Oro, San Marcos, California by 4:30 p.m., Friday, May 6, 2022.

Ann Johnson	

# MINUTES OF A REGULAR MEETING OF THE BOARD OF DIRECTORS OF THE VALLECITOS WATER DISTRICT WEDNESDAY, APRIL 20, 2022, AT 5:00 PM, AT THE DISTRICT OFFICE 201 VALLECITOS DE ORO, SAN MARCOS, CALIFORNIA

President Elitharp called the Regular meeting to order at the hour of 5:00 p.m.

Present: Director Boyd-Hodgson

Director Elitharp
Director Hernandez
Director Pennock
Director Sannella

Staff Present: General Manager Pruim

Assistant General Manager Gumpel

Legal Counsel Gilpin

Administrative Services Manager Emmanuel

District Engineer Hubbard Finance Manager Owen

Operations & Maintenance Manager Pedrazzi Development Services Senior Engineer Lopez

Public Information/Conservation Supervisor Robbins

Principal Financial Analyst Arthur

Information Technology Technician Todd

**Executive Assistant Johnson** 

Director Hernandez led the pledge of allegiance.

#### **ADDITIONS TO THE AGENDA**

None.

#### ADOPT AGENDA FOR THE REGULAR MEETING OF APRIL 20, 2022

22-04-06 MOTION WAS MADE by Director Boyd-Hodgson, seconded by Director

Sannella, and carried unanimously, to adopt the agenda for the Regular Board

Meeting of April 20, 2022.

#### PUBLIC COMMENT

None.

#### CONSENT CALENDAR

22-04-07 MOTION WAS MADE by Director Sannella, seconded by Director Hernandez,

and carried unanimously, to approve the Consent Calendar as presented.

#### 1.1 Approval of Minutes

- A. Engineering/Equipment Committee Meeting March 23, 2022
- B. Public Awareness/Personnel/Policy Committee Meeting April 4, 2022
- C. Regular Board Meeting April 6, 2022
- D. Finance/Investment Committee Meeting April 11, 2022
- 1.2 Warrant List through April 20, 2022 \$3,709,151.43
- 1.3 Financial Reports
  - A. Water Meter Count March 31, 2022
  - B. Water Production/Sales Report 2021/2022
  - C. Quarterly Financial Report March 31, 2022
  - D. Per Capita Water Consumption March 31, 2022
  - E. Water Revenue and Expense Report March 31, 2022
  - F. Sewer Revenue and Expense Report March 31, 2022
  - G. Reserve Funds Activity March 31, 2022
  - H. Investment Report March 31, 2022
  - I. Legal Fees Summary March 31, 2022
- 1.4 Operations & Maintenance Metrics Quarterly Report March 31, 2022
- 1.5 Approval of Construction Agreement for Discovery Village Segment 2B Water Improvements (Discovery SL, LLC)
- 1.6 Approval of Construction Agreement for Discovery Village Segment 3 Water Improvements (Discovery SL, LLC)
- 1.7 Approval of Construction Agreement for High Point Water Main Replacement Phase 1 (TTLC CALWEST, LLC)
- 1.8 Final Acceptance of Water and Sewer Improvements for Sunset Ridge Subdivision Improvements (Raecorte Development, LLC)
- 1.9 Pay Adjustment for Operations and Maintenance Contract Coordinator

#### ACTION ITEM(S)

#### WATER SUPPLY CONDITIONS UPDATE AND GOVERNOR'S REQUEST

Public Information/Conservation Supervisor Robbins facilitated a presentation, Update on Water Supply Conditions, as follows:

- Vallecitos Currently in a Level 1 Drought Watch
- Northern Sierra 8-Station Precipitation Index
- Snowpack Water Content
- California Reservoir Storage
- Colorado River Status
- Three-Month Temperature Outlook
- Three-Month Precipitation Outlook
- Governor Newsom Asks Water Agencies to Move to Level 2
- Governor's Executive Order of March 28, 2022
- Decorative Grass or Non-Functioning Turf
- Level 2 Drought Alert 20% Reduction
- Vallecitos Water District Ordinance No. 219
- Recommendation

Public Information/Conservation Supervisor Robbins stated the Governor's Executive Order of March 28, 2022, calls for local water suppliers to move to Level 2 of their Water Shortage Contingency Plans and directs the State Water Resources Control Board to consider a ban on watering decorative grass at businesses and institutions.

General discussion took place during and after the presentation.

Staff recommended the Board declare a Level 2 – Drought Alert within the District's service area, limiting customer irrigation to two days per week through May and three days per week June through October on a schedule of their own choosing.

Further general discussion took place.

22-04-08 MOTION WAS MADE by President Elitharp, seconded by Director Hernandez, and carried 4 – 1, with Director Sannella voting no, to approve staff's recommendation to declare a Level 2 – Drought Alert.

#### 2022 COST OF SERVICE STUDY UPDATE

Principal Financial Analyst Arthur presented an update on the Cost of Service Study (COSS) which included the following:

- COSS Calendar
- Fixed Ready-to-Serve (RTS) Charges
- Commodity Rates
- Sample Bill
- Drought Rates
- Proposition 218
- Rate Survey
- COSS Report

Principal Financial Analyst Arthur stated staff will provide the Board with a copy of the Comprehensive Water Cost-of-Service Study and draft Proposition 218 Notice in advance of the May 10, 2022, Special Board meeting, at which the COSS will be discussed again.

General discussion took place during and after the presentation.

This item was presented for information only.

### SAN DIEGO NORTH ECONOMIC DEVELOPMENT COUNCIL (SDNEDC) ANNUAL ECONOMIC SUMMIT

General Manager Pruim stated the SDNEDC will be holding its 9<sup>th</sup> Annual North County Economic Summit on Wednesday, May 11, 2022. The SDNEDC is not on the list of organizations for which meetings are considered compensable under Ordinance No. 216; therefore, prior approval for per diem and expense reimbursement is required.

General discussion took place.

22-04-09 MOTION WAS MADE by Director Hernandez and seconded by President Elitharp to approve per diem and expenses to attend the SDNEDC Economic Summit.

Further discussion took place regarding the benefit and cost of attending the event.

22-04-10 MOTION WAS MADE by Director Hernandez, seconded by President Elitharp, and carried unanimously, to approve per diem and expenses for Director Hernandez to attend the 2022 SDNEDC Economic Summit.

#### <u>REPORTS</u>

#### GENERAL MANAGER

General Manager Pruim reported the following:

- At their annual awards ceremony on April 14, 2022, the California Water Environment Association presented the District with two awards: second place for Tertiary Treatment Plant (Meadowlark Water Reclamation Facility) and first place for Best Use of Social Media ("Work We Do" video series).
- The next Board meeting will be a Special Board meeting on May 10, 2022. At that meeting, fifth grade students from La Costa Meadows Elementary School who participated in the Water Leadership Program provided by Bill Dean will be in attendance to make a presentation to the Board.

#### DISTRICT LEGAL COUNSEL

Legal Counsel Gilpin reported that the Kessner litigation has been dismissed, and provided an update on Assembly Bill (AB)1944 which was reintroduced yesterday. AB 1944 is an amendment to the Brown Act which would allow Directors to attend public meetings virtually, outside of a state of emergency or pandemic, without the requirement of posting their location on the agenda. A majority of the Board would still be required to be physically within the District's jurisdiction during a public meeting.

#### SAN DIEGO COUNTY WATER AUTHORITY

Director Elitharp stated the SDCWA Board will hold their regular meeting on April 28, 2022.

#### **ENCINA WASTEWATER AUTHORITY**

Director Hernandez reported that the Capital Improvement Committee met this morning. The Committee received updates on several projects and reviewed the EWA budget.

Director Sannella stated the Policy and Finance Committee met on April 12, 2022. The Committee received updates on the proposed EWA operating budget and air quality health risk assessment.

#### STANDING COMMITTEES

Director Sannella stated the Hillside Property Development Ad Hoc Committee will meet on April 22. The Committee will be conducting interviews with firms to assist in developing options for the Board's consideration.

President Elitharp summarized the discussion that took place at the Engineering/Equipment Committee meeting on April 11.

#### DIRECTORS REPORTS ON TRAVEL/CONFERENCES/SEMINARS ATTENDED

Director Boyd-Hodgson reported on her attendance to a California Special Districts Association virtual workshop, Prevailing Wage: Basics and Beyond.

#### OTHER BUSINESS

None.

#### **DIRECTORS COMMENTS/FUTURE AGENDA ITEMS**

Director Hernandez requested an update on the Lake San Marcos lawsuit. Legal Counsel Gilpin will report back at the next Board meeting.

General Manager Pruim stated the public workshop meeting regarding capacity funds is scheduled for Wednesday, April 27 at 5:00 p.m. in the Board Room.

Director Sannella suggested that during the current review of Ordinance No. 216, the subject of the Board's conference attendance be reviewed.

#### **ADJOURNMENT**

There being no further business to discuss, President Elitharp adjourned the Regular Meeting of the Board of Directors at the hour of 6:30 p.m.

A Special Meeting of the Vallecitos Board of Directors has been scheduled for Tuesday, May 10, 2022, at 5:00 p.m. at the District office, 201 Vallecitos de Oro, San Marcos, California.

Craig Elitharp, President
Board of Directors
Vallecitos Water District

ATTEST:

Glenn Pruim, Secretary Board of Directors Vallecitos Water District

# MINUTES OF A MEETING OF THE ENGINEERING/EQUIPMENT COMMITTEE OF THE VALLECITOS WATER DISTRICT TUESDAY, APRIL 26, 2022, AT 3:00 P.M. AT THE DISTRICT OFFICE IN THE BOARD ROOM 201 VALLECITOS DE ORO, SAN MARCOS, CALIFORNIA

Director Hernandez called the meeting to order at the hour of 3:00 p.m.

Present: Director Elitharp

Director Hernandez

Assistant General Manager Gumpel

District Engineer Hubbard

Capital Facilities Senior Engineer Morgan Engineering Services Assistant Fretwell

#### **PUBLIC COMMENT**

None.

#### ITEM(S) FOR DISCUSSION

#### CAPITAL IMPROVEMENT PROJECTS QUARTERLY UPDATE

Capital Facilities Senior Engineer Morgan briefly demonstrated where quarterly updates for Capital Improvement Program (CIP) projects can be accessed on the District's website: <a href="https://www.vwd.org/departments/engineering/capital-facilities">https://www.vwd.org/departments/engineering/capital-facilities</a>.

Capital Facilities Senior Engineer Morgan provided a brief update on three of the CIP projects currently listed online for Quarter 3 of Fiscal Year (FY) 2021-2022. A contract has been awarded for the Sewer Lining and Rehabilitation 2021 Project, and construction will be mobilized in May 2022. The San Marcos Interceptor Phase 2 Project has been completed. It is still on the list since retention was paid in the third quarter. Sage Canyon Tank Refurbishment is currently in construction. The 3.7 million gallon (MG) water tank is undergoing a coating and structural refurbishment with an expected July or August completion date.

Regarding the San Marcos Interceptor Phase 2 Project, Director Elitharp asked if trunk laterals join the sewer interceptor within the San Marcos Creek boundaries and if there was any need for special construction. Capital Facilities Senior Engineer Morgan stated an 8" diameter collector pipe joins the sewer interceptor at a manhole, not on the mainline. Assistant General Manager Gumpel added most trunk sewer lateral connections are out of the creek boundaries on the San Marcos Boulevard side. Two sewer lines cross the San Marcos Creek at Bent Avenue and Via Vera Cruz before they tie into the interceptor sewer.

Director Elitharp asked for an update on the Meadowlark Water Reclamation Facility's (MRF) Sodium Hypochlorite Project. Capital Facilities Senior Engineer Morgan stated that a meeting occurred on the same day to finalize the preliminary design report (PDR). Trussell Technologies participated in the meeting to provide peer review services. The next expected deliverable will be 60% design.

Assistant General Manager Gumpel stated that the Capital Department has been busy and productive with the 13 active CIP projects.

### TASK ORDER AMENDMENT APPROVAL FOR THE MEADOWLARK WATER RECLAMATION FACILITY LANDSCAPING IMPROVEMENTS PROJECT

Capital Facilities Senior Engineer Morgan provided background information on the Landscaping Improvements Project. He stated several reasons Meadowlark Water Reclamation Facility (MRF) needs landscaping improvements: 1) landscaping requires high maintenance; 2) erosion and runoff; 3) aesthetically inconsistent theme; and 4) irrigation system challenges.

Capital Facilities Senior Engineer Morgan stated that NV5 completed the preliminary design report (PDR) and conceptual layouts, which include areas for new plantings, selective replacement plantings, a rock garden, and a multi-purpose trail. To prevent storm water runoff, the slope will be stabilized with modular retaining walls, a bonded fiber matrix, biodegradable matting, and/or landscape boulders. These measures will keep the area in regulatory compliance. Low-maintenance native and non-native plants were chosen and will provide aesthetics and reduce staff maintenance. There are various options for sculptural accents and water features in the PDR. The overall landscape will change to provide the Operations and Maintenance Departments safe access to perform routine maintenance and improve the irrigation system.

With a task order amendment approval, the project will go into the final design phase. The schedule outlines final design to end in May 2022. The bid advertisement will go out in September and will be awarded in November. Construction is anticipated to begin in January 2023 and end in April 2023.

Capital Facilities Senior Engineer Morgan stated the project is identified and approved in the FY 21/22 Budget with a budget amount of \$180,000. The project funding source is 100% from Sewer Replacement funds. The total estimated project cost and budget summary are as follows:

Budget	\$ 180,000
PDR	\$ 20,618
Design Phase Services	\$ 45,655
Design Phase Services (Staff)	\$ 10,000*
Overhead and Materials	\$ 20,000*
Construction Contract	\$ TBD
Total	\$ 96,273*
<del>.</del> .	

<sup>\*</sup>Estimated Fee

The FY 22/23 project budget is being increased to accommodate the complete scope of work.

Director Hernandez asked if the District requires approval from the City of Carlsbad. Assistant General Manager Gumpel stated that since the project is on the District's site, the District is exempt from those types of permits. Water facilities and existing sewer facilities have broad exemptions. However, to build a new sewer facility the District would not be exempt from land use agencies' jurisdictions.

Staff is seeking the Engineering & Equipment Committee's support of staff's recommendation to execute an amendment under the current task order with NV5 in the amount of \$45,655 for final design phase services for the MRF Landscaping Improvements Project. Also, staff would like the support of the Committee to put this item on the consent calendar at the first Board meeting in May 2022.

The Committee supports staff's recommendation.

#### FREQUENCY OF ENGINEERING/EQUIPMENT COMMITTEE MEETINGS

Assistant General Manager Gumpel stated that the District has many projects in the construction phase within the Capital and Development Services departments. There will not be many upcoming items that need Committee input or review. Staff is seeking approval to move the Engineering/Equipment Committee Meetings to a quarterly basis instead of a monthly basis. This proposed schedule would coincide with the Capital Department's quarterly updates and the Development Services Department's bi-annual updates. If items require further input or review from the Committee, meetings may be scheduled in between the quarterly meetings based on availability and need.

The Committee supports staff's recommendation to move Engineering/Equipment Committee meetings to a quarterly schedule for a two quarter trial period. Director Hernandez reinforced that the Committee would like to review change orders and to add additional meetings for complicated items. District Engineer Hubbard stated that when items need feedback and support from the Committee, staff will seek additional meetings.

#### **OTHER BUSINESS**

None.

#### <u>ADJOURNMENT</u>

There being no further business to discuss, the meeting was adjourned at the hour of 3:21 p.m.

## MINUTES OF A WORKSHOP MEETING OF THE BOARD OF DIRECTORS OF THE VALLECITOS WATER DISTRICT WEDNESDAY, APRIL 27, 2022, AT 5:00 PM, AT THE DISTRICT OFFICE 201 VALLECITOS DE ORO, SAN MARCOS, CALIFORNIA

President Elitharp called the Workshop Meeting to order at the hour of 5:00 p.m.

Present: Director Boyd-Hodgson

Director Elitharp Director Hernandez Director Pennock Director Sannella

Staff Present: General Manager Pruim

Assistant General Manager Gumpel

Legal Counsel Gilpin District Engineer Hubbard Finance Manager Owen

Capital Facilities Senior Engineer Morgan
Development Services Senior Engineer Lopez

Accounting Supervisor Rathsam Principal Financial Analyst Arthur

Information Technology Technician Todd

**Executive Assistant Johnson** 

Director Sannella led the pledge of allegiance.

#### ADDITIONS TO THE AGENDA

None.

#### ADOPT AGENDA FOR THE WORKSHOP MEETING OF APRIL 27, 2022

22-04-11 MOTION WAS MADE by Director Hernandez, seconded by Director Boyd-

Hodgson, and carried unanimously, to adopt the agenda for the Workshop

Meeting of April 27, 2022.

#### PUBLIC COMMENT

None.

#### ITEM FOR DISCUSSION

#### CAPITAL FACILITIES EXPANSION (CAPACITY) FUND PRESENTATION

President Elitharp stated the purpose of the Workshop Meeting was to continue discussion regarding the District's capacity funds and the differences in finances between the District's ratepayer funds and capacity funds.

General Manager Pruim briefly discussed how the District manages its public funds, differentiating between water replacement and capacity funds and wastewater replacement and capacity funds. Monies are never moved between the four separate funds or used for purposes other than for the purpose the funds were received. He stated a small group of ratepayers has raised concerns regarding the capacity fund deficit which was eliminated when the District issued \$28 million in debt in August 2021. Debt service payments to repay that debt will be made from the fees collected from developers, not ratepayers.

Assistant General Manager Gumpel presented information on the following:

- Pieces of the Master Plan and Nexus Study
  - Land Use
  - Future Growth Projections
  - Duty or Use Factors
  - Historical Water and Sewer Demands
  - Industry Standards
  - o Design Criteria
  - Water and Sewer Models
  - Capital Improvement Program (CIP)
  - Program Environmental Impact Report (PEIR)
  - General Public Outreach
  - Organizations Outreach
  - o Building Industry Association and Development Community Input
  - Mitigation Fee Act and Other Laws
  - Capacity Fee Nexus Study
  - Flexibility
- Capacity Fee Methodology
- District Sewer Infrastructure
- District Water Infrastructure
- District CIP Detail
- Capacity Fee General Methodology
- Anticipated Schedule
- Conclusion Each Component of the Process Is Critical

General discussion took place.

Finance Manager Owen facilitated a presentation, Capital Facilities Expansion (Capacity) Fund, as follows:

- Purpose of the Presentation Are Ratepayers Funding Development?
- District Reserves
- Replacement Fund
  - Customer Rates
- Cost of Service Study 2019
- District Reserve Policy
- Best Practices
- District Policy
- Replacement Reserves
- Capacity Reserves
- Capacity Fee Timing
- Scenarios Capacity Fee Model
- Capacity Reserves Historical
- Capacity Fund Deficit
- Capacity Shortfall Action Plan
- Capacity Reserves
- Capacity Fees
- Summary
- Conclusion Are Ratepayers Funding Development? No. Growth Pays for Growth.

General Manager Pruim stated the District is well positioned for the future with healthy reserve levels and that the District's water rates are in the lowest quartile in San Diego County.

General discussion took place.

The Board heard comments and questions from members of the public Melissa Magallanes, Fran Grizas, Donna Nickel, Tom Scaglione, and Susie Glass. Staff responded to the public's questions.

#### **OTHER BUSINESS**

None.

#### **ADJOURNMENT**

There being no further business to discuss, President Elitharp adjourned the Workshop Meeting of the Board of Directors at the hour of 7:36 p.m.

A Special Meeting of the Vallecitos Board of Directors has been scheduled for Tuesday, May 10, 2022, at 5:00 p.m. at the District office, 201 Vallecitos de Oro, San Marcos, California.

Craig Elitharp, President Board of Directors Vallecitos Water District

**PROJECT** 

#### **BACKGROUND:**

The existing landscape at the Meadowlark Water Reclamation Facility (MRF) needs improvements to address the high maintenance erosion on steeper slopes, and aesthetically inconsistent theme created over the years. In addition, the existing irrigation system has experienced several clogging problems, presumably from the use of recycled water.

The MRF Landscaping Improvements Project seeks to improve the landscape by replacing the existing vegetation with drought tolerant plants, providing slope stabilization at the eroded areas, and creating safe access for District staff to perform routine maintenance.

The project is scheduled for design in the Fiscal Year (FY) 2021/2022 and construction in the FY 2022/2023 Capital Improvement Project Budget.

#### **DISCUSSION:**

NV5 was selected from the District's As-Needed Engineering Services List to provide a Preliminary Design Report (PDR) encompassing an initial assessment, conceptual architectural design, and construction estimate for the MRF Landscaping Improvement Project. On October 6, 2021, the District executed a Task Order in the amount of \$20,618 for the PDR.

The PDR was completed March 2021, which included a preferred plant palette combination of native species and introduced non-natives well adapted to the region. Native species will provide ecological and habitat continuity between the MRF site and surrounding canyon landscapes. The proposed plants will be arranged to balance aesthetics, function, and fire-wise BMP's. Irrigation system improvements and additional hardscape features are included in the improvements to provide operations staff functionality and access to adequately maintain MRF infrastructure and landscape. Staff requested a scope and fee for final design services from NV5 on March 28 to design and prepare the plans, technical specifications, and engineers estimate.

The project scope and staff recommendation were presented to the Engineering/Equipment Committee on April 26, 2022.

#### **FISCAL IMPACT:**

The project is identified and approved in the FY 21/22 Budget with a budget amount of \$180,000. The project funding source is 100% from Sewer Replacement funds. The total estimated project cost and budget summary are as follows:

Budget	\$ 180,000
PDR	\$ 20,618
Design Phase Services	\$ 45,655
Design Phase Services (Staff)	\$ 10,000*
Overhead and Materials	\$ 20,000*
Construction Contract	\$ TBD
Total	\$ 96,273*

<sup>\*</sup>Estimated Fee

#### **RECOMMENDATION:**

Staff, with support from the Engineering & Equipment Committee, recommends the Board of Directors authorize the General Manager to execute Amendment No. 1 under the current Task Order with NV5 in the amount of \$45,655 for Final Design Phase Services for the MRF Landscaping Improvements Project.

23 Item 1.3

DATE: MAY 10, 2022

TO: BOARD OF DIRECTORS

SUBJECT: RESOLUTION FOR DISTRICT CREDIT CARD POLICY UPDATE

#### **BACKGROUND:**

On December 7, 2016, the Board of Directors approved Resolution No. 1507, updating the District credit card policy and designating specific staff member' authorization to utilize District credit cards in the course of conducting official District business.

#### DISCUSSION:

In order to better control expenditures, the District minimizes the number of credit cards it utilizes, as well as the number of staff authorized to use the cards. Changes in personnel, purchasing responsibilities and purchasing needs dictate the need to update the credit card policy on a regular basis. An updated resolution is required to be submitted to the Board of Directors for any changes. A new resolution is attached to this staff report highlighting Section 4.1, which contains changes to the list of credit cards and authorized users.

#### **FISCAL IMPACT:**

None.

#### **RECOMMENDATION:**

Staff recommends adoption of the resolution to update the list of credit cards and authorized users.

#### **ATTACHMENT:**

Resolution

#### **RESOLUTION NO.**

### RESOLUTION OF THE BOARD OF DIRECTORS OF THE VALLECITOS WATER DISTRICT UPDATING CREDIT CARD POLICY AND PROCEDURES FOR THE DISTRICT AND RESCINDING RESOLUTION 1507

WHEREAS, in order to assist in the transaction of official District business, it is the stated intent and policy of the Vallecitos Water District to issue credit cards to appropriate District employees and authorize their use for official District business; and

NOW, THEREFORE, BE IT RESOLVED THAT the Board of Directors of the Vallecitos Water District does hereby enact as follows:

#### **Section 1: Oversight**

<u>Section 1.1:</u> The General Manager shall determine the appropriate District employees to be issued credit cards. The Finance Manager is hereby designated the responsibility of credit card issuance, accounting, monitoring of use, credit card retrieval, payment of all charges, maintenance of a list of authorized users and cards assigned to them and general compliance with this resolution.

#### Section 2: Authorization, Use, Reporting and Return

- <u>Section 2.1:</u> Only those who are authorized by the General Manager and who have signed a Credit Card user Agreement may use District credit cards.
- <u>Section 2.2:</u> Credit cards shall only be used to purchase goods or services directly related to official District business.
- <u>Section 2.3:</u> Determination of the appropriate use of District credit cards, including setting credit limits on individual accounts, shall be solely within the discretion of the General Manager or designee.
- <u>Section 2.4:</u> All authorized users of District credit cards shall make purchases only in accordance with the District's purchasing policy. The only credit card purchases allowed for travel are those expenses that would otherwise be reimbursable under the Conference Attendance, Expense Reimbursement and Travel Policy, Resolution No. 1499.
- <u>Section 2.5:</u> District credit card users shall submit appropriate documentation detailing the goods and/or services purchased, the cost of the goods and/or services, the date of the purchase and the official business purpose to the Accounting Department promptly upon making charges against the card.
- <u>Section 2.6:</u> District credit cards shall not be used for cash advances, personal use, or any type of purchase not specifically permitted under the District's Purchasing Policv.
- <u>Section 2.7:</u> Authorized employees who are issued District credit cards shall be responsible for their custody and protection against theft or misuse and shall immediately notify the Finance Manager if the credit card is lost or stolen.

Resolution No. Page 2

<u>Section 2.8:</u> Authorized employees who are issued District credit cards shall return credit cards immediately upon termination of employment or service with the District.

<u>Section 2.9:</u> Outstanding balances of District credit cards, including interest due on an extension of credit under the credit card arrangement, shall be paid in full within thirty (30) days of the initial statement date.

#### **Section 3: Internal Controls**

- <u>Section 3.1:</u> A current list of all credit cards, authorized users and credit limits shall be kept on file with the Finance Manager at all times. The updated list of Credit Card Holders is set forth in Section 4, below.
- <u>Section 3.2:</u> The list referenced in section 3.1 above shall be submitted to the Board of Directors for any changes.
- <u>Section 3.3:</u> The supervisor of the department wherein a credit card purchase is made shall review and approve all documentation detailing the goods and/or services purchased, the cost of the goods and/or services, the date of the purchase and the official business purpose prior to submission of invoices to the Accounting Department for payment.
- <u>Section 3.4:</u> The Board of Directors shall be responsible for approval of payment through regular review and approval of the Warrant List at a duly noticed Board of Directors meeting.
- <u>Section 3.5:</u> Any employee of the District who violates the provisions of this policy shall be subject to disciplinary action, up to and including termination, as well as appropriate criminal and/or civil action.

#### **Section 4: Credit Card Holders**

Section 4.1: Updated 5/3/22

Employee	Card(s)	Title
Glenn Pruim	Union Bank	General Manager
Ed Pedrazzi	Union Bank (Shared	Operations & Maint Mgr
Meagan Funk	Company Card)	O&M Contract Coordinator
Dennis Bowman	Home Depot Fry's Smart & Final	Senior Purchasing Specialist
Virginia Saavedra Veronica Flores	Union Bank (Shared Company Card) Smart & Final	Finance Assistant Cashier/Receptionist

PASSED, APPROVED AND ADOPTED by the Board of Directors of the Vallecitos Water
District at a Special meeting held on the 10 <sup>th</sup> day of May 2022, by the following roll call vote:

AYES: NOES: ABSTAIN: ABSENT:

> Craig Elitharp, President Board of Directors Vallecitos Water District

ATTEST:

Glenn Pruim, Secretary Board of Directors Vallecitos Water District DATE: MAY 10, 2022

TO: BOARD OF DIRECTORS

SUBJECT: CONSIDERATION OF ORGANIZATIONAL ACHIEVEMENT AWARDS

#### **BACKGROUND:**

The District's Employee Recognition Program recognizes employees in a variety of ways for their individual and team contributions in support of the District's Mission and Vision. Employees who receive certifications and other individual achievements may be recognized at a regular Board meeting. Other forms of recognition are at the discretion of the District. The total cost of awards per year will not exceed \$8,000 (excluding service awards).

#### **DISCUSSION:**

Organizational Achievement Awards are lump sum monetary awards awarded by the Board with gainsharing funds, or when the District, specific department, or function, receives state or local awards from external organizations (i.e., CSDA, CWEA, or CASA). At the Board meeting held on April 20, 2022, General Manager Pruim reported the District had won an award from the California Water Environment Association (CWEA): First Place for Community Engagement & Outreach Best Use of Social Media for the District's "Work We Do" videos.

This award recognizes achievements in promoting awareness and understanding of water quality issues through social media campaigns. As summarized by CWEA:

"VWD began creating videos to document the District's workforce and infrastructure improvements on social media platforms, the District's website and its YouTube channel. The "Work We Do" videos give the public an opportunity to see crews in action providing our community with reliable drinking water and wastewater services, protecting the environment, raising up the next generation of water workers and more.

The videos are featured on VWD's website, on social media (Facebook, Twitter and LinkedIn) and YouTube. This enables VWD's message to be shared incredibly quickly. The San Diego County Water Authority uses these videos on their Water News Network platform for the entire San Diego region.

The District also partnered with the Center for Water Studies to promote the "Work We Do" videos and educate students on careers in the water and wastewater industry, and they are viewed in the classroom and on social media at the university."

Staff recommends the Board consider Organizational Achievement Awards for the three employees directly responsible for the creation and sharing of the District's "Work We Do" videos on social media: Public Information/Conservation Supervisor Chris Robbins, and Public Information Representatives Lisa Urabe and Alicia Yerman.

#### **FISCAL IMPACT:**

The lump sum bonuses for the California Water Environment Association (CWEA) Community Engagement & Outreach Best Use of Social Media 2021-22 Award would be paid from the Fiscal Year 2021/2022 budget for the Employee Recognition Program.

#### **RECOMMENDATIONS:**

Approve Organizational Achievement Awards for the above-named employees which would include individual lump sum bonuses in the amount of \$100.

#### **ATTACHMENT:**

None.

DATE: MAY 10, 2022

TO: BOARD OF DIRECTORS

SUBJECT: ADOPTION OF RESOLUTION OF THE BOARD OF DIRECTORS OF THE

VALLECITOS WATER DISTRICT APPROVING ENCINA WASTEWATER AUTHORITY'S FISCAL YEAR 2023 OPERATING AND CAPITAL

**IMPROVEMENT BUDGET** 

#### **BACKGROUND:**

The Vallecitos Water District is a party to the Encina Joint Powers Basic Agreement entered into on July 13, 1961, for the acquisition, construction, ownership, operation, and maintenance of the Encina Joint Sewer System. The Encina Basic Agreement requires unanimous approval of the Encina Wastewater Authority (EWA) budget by member agencies prior to the budget becoming effective. The EWA board will be considering final budget adoption at its meeting scheduled for July 27, 2022.

#### **DISCUSSION:**

Attached for the Board's information are excerpts from the final EWA recommended budget. The fiscal year ending 2023 budgets of EWA as unanimously approved by the EWA Board of Directors and the Joint Advisory Committee on April 27, 2022, are \$27.0 million for the total capital budget, and \$19.5 million for the total operating budget. The full budget document is available for review at the District office and online at <a href="https://www.encinajpa.com">www.encinajpa.com</a>.

The Proposed Encina Wastewater Authority Operating, and Capital Program Budgets total approximately \$46.5 million and are summarized below:

	Actual	Budget	Recommended	
	FY2021	FY2022	FY2023	% Change
Operating Program	\$ 18,527,604	\$ 18,822,867	\$ 19,528,774	3.8%
Capital Program	\$ 26,951,478	\$ 23,294,844	\$ 27,005,586	15.9%
Combined Program Budgets	\$ 45,479,082	\$ 42,117,711	\$ 46,534,360	10.5%

The amounts shown in the table above are for the entire EWA budget. Vallecitos Water District's share of the EWA budget is dependent upon the demands place on EWA facilities and the ownership percentage currently held by the District. Based on those factors, Vallecitos' share of the Proposed 2023 Operating budget is \$3,303,792, which is \$35,152 (1.1%) lower than the FY 2022 Operating budget. Vallecitos' share of the Proposed 2023 Capital budget is \$5,602,850, which is \$982,348 (21.3%) higher than the FY 2022 Capital budget.

#### **FISCAL IMPACT:**

Vallecitos' share of EWA's Operating and Capital Budget have been incorporated into the District's budget, which will be considered on June 1, 2022.

RECOMMENDATION:
Staff recommends the Board of Directors of the Vallecitos Water District review and adopt a Resolution approving the Encina Wastewater Authority's Fiscal Year 2023 recommended Operating and Capital Improvement Budget.

To: Honorable Chair and Members of the Board of Directors

**Encina Joint Advisory Committee** 

Boards and Councils of the Encina Member Agencies

From: Scott McClelland, General Manager

Subject: Transmittal of FY2023 Recommended Operating & Capital Budgets

This letter transmits the Encina Wastewater Authority's (EWA) Recommended Fiscal Year 2023 Operating and Capital Budgets. In conformance with the Revised Basic Agreement for Ownership, Operation and Maintenance of the Encina Joint Sewage System, this Recommended Budget estimates both the amount of money required to operate, maintain and administer the Joint System during Fiscal Year 2023, and the proportionate amount to be paid by each Member Agency.

#### **OPERATING BUDGET OVERVIEW**

The Recommended FY2023 Operating Budget is comprised of seven (7) operational programs that provide services to the Encina Member Agencies. Each operational program includes direct personnel and non-personnel expenses and related internal service fund (ISF) charges. The Recommended FY2023 Budget reflects management's strategies and objectives to ensure continued achievement within each of the six (6) Business Principles identified in the Five-Year Strategic Business Plan: Protect Public Health and the Environment; Pursue Waste Resource Recovery Opportunities; Conduct Sound Planning and Invest Appropriately; Remain Efficient, Fiscally Responsible, and Innovative; Provide Meaningful Transparency; and Deliver Exceptional Member Agency Service. The Recommended FY2023 Operating Budget totals \$19.5M for the seven (7) operational programs summarized below:

Operating Program	Actual FY2021	Budget FY2022	Recommended FY2023	FY 2022 vs FY 2023 % Change
Encina Water Pollution Control Facility	\$ 14,172,954	\$ 14,813,465	\$ 15,607,229	5.4%
Environmental Compliance – Source Control	\$ 1,036,871	\$ 915,542	\$ 904,348	-1.2%
Agua Hedionda Pump Station	\$ 599,217	\$ 859,193	\$ 743,735	-13.4%
Buena Vista Pump Station	\$ 705,363	\$ 734,851	\$ 764,909	4.1%
Buena Creek Pump Station	\$ 536,675	\$ 524,451	\$ 582,396	11.0%
Carlsbad Water Recycling Facility	\$ 1,225,786	\$ 1,405,351	\$ 1,461,581	4.0%
Raceway Basin Pump Station	\$ 250,738	\$ 282,014	\$ 282,576	0.2%
Sub-Total: Expenses	\$ 18,527,604	\$ 19,534,867	\$ 20,346,774	4.2%
Estimated Other Operating Revenue	\$ -	\$ (712,000)	\$ (818,000)	14.9%
Total Operating Budget	\$ 18,527,604	\$ 18,822,867	\$ 19,528,774	3.8%

The FY2023 Operating Budget reflects EWA's continuing commitment to provide sustainable and fiscally responsible wastewater services to the communities it serves while maximizing the use of alternative and renewable resources. The Recommended FY2023 EWPCF Operating Budget includes \$250,000 in contingency funding to help each of the Member Agencies make sufficient appropriations for their share of EWA expenditures as part of their annual budgeting processes.

#### **CAPITAL BUDGET OVERVIEW**

The Recommended FY2023 Capital Budget totals \$27M for the following EWA capital programs summarized below:

Capital Program	Actual FY2021	Budget FY2022	Recommended FY2023	FY 2022 vs FY 2023 % Change	
EWPCF – Capital Improvements	\$ 21,584,452	\$	16,454,000	\$ 20,900,000	27.0%
EWPCF – Planned Asset Rehabilitation	\$ 914,788	\$	1,101,000	\$ 1,156,000	5.0%
EWPCF – Capital Acquisitions	\$ 264,961	\$	349,000	\$ 356,000	2.0%
Remotes Facilities – Acquisitions & Rehabilitation	\$ 1,473,545	\$	2,488,500	\$ 1,681,800	-32.4%
Allocated Personnel Expenses	\$ 2,713,732	\$	2,902,344	\$ 2,911,786	0.3%
Total Capital Budget	\$ 26,951,478	\$	23,294,844	\$ 27,005,586	15.9%

Improvement Projects are planned, scoped, and prioritized through the Comprehensive Asset Management Program (CAMP). The most recent CAMP was published in June 2021 and will continue to be updated biannually. It considers anticipated changes in regulatory requirements, prospective operational efficiencies, funding availability and other factors.

The Recommended FY2023 Capital Budget includes approximately \$2.9 million in funding for 14.01 full-time equivalent (FTE) positions. These positions include full and part-time efforts of EWA executives, professionals, managers, and technical staff who plan, direct, and support EWA's Capital Program.

Significant Capital Improvement Projects for FY2023 funding includes the Digester Rehabilitation and Improvements (\$9.9M), the Dissolved Air Flotation Tank Repairs (\$1.8M), and Secondary Clarifiers and Strainers Improvements (\$1.6M).

EWPCF – Planned Asset Rehabilitation and Replacement (PARR) reflects minor plant rehabilitation efforts undertaken by EWA staff to maintain the \$530 million worth of Joint System assets. PARR Projects total \$1.2M. EWPCF – Capital Acquisitions total \$0.4M and reflect appropriate investment in minor infrastructure, equipment. Remote Facilities – Acquisitions and Rehabilitation total \$1.7M and reflect appropriate investment in remote facility improvements.

In closing, it would not be appropriate to transmit the Recommended FY2023 Budget without taking note of the tumultuous, unpredictable time in which much of the nation and world are experiencing while this document was being developed. After experiencing two years of a worldwide pandemic which may or may not be coming to an end, the world is now experiencing significant supply chain disruptions, price fluctuations, and inflation that has not been experienced in decades. In addition, world powers are currently in a state of unrest. Staff has made every effort to coordinate with the Member Agencies and use its best judgement in developing the budget but acknowledges the unpredictable nature in which the document was developed.

Please join me in recognizing the staff whose efforts produced this document. Joseph Spence, Assistant to the General Manager, led staff efforts in the preparation and development of the Recommended FY2023 Budget. The Executive Leadership Team coordinated the budget development processes within their respective departments. Director of Administrative Services, LeeAnn Warchol, made certain our constantly developing ideas were presented clearly, consistently and accurately.

Respectfully Submitted,

Smillent

Scott McClelland General Manager

### **Policy Brief**

Date: April 27, 2022

To: Honorable Chair and Members of the Board of Directors

**Encina Joint Advisory Committee** 

Boards and Councils of the Encina Member Agencies

From: Scott McClelland, General Manager

Subject: Workforce Staffing Strategy

The Encina Wastewater Authority's (EWA) workforce staffing strategy is linked directly to its mission, vision, values and strategic business and tactical plans. It includes a cost-effective blend of human resources that includes permanent employees, consultants, contract and limited duration employees. Staffing decisions are based on established criteria designed to add value to the organization, reduce risk, and complement or leverage existing staff competencies.

The staffing needs of EWA are reviewed annually. With few exceptions, decisions to expand or contract EWA's total complement of Full Time Equivalent (FTE) staff are made as part of the budget development process. Department Directors requesting additional staff are required to submit a written report to the General Manager justifying the request.

EWA's staffing strategy centers on identifying the core workforce needed for ongoing work, which is essential to its mission on a permanent basis and should therefore be permanently staffed, as opposed to work that may be equally important to EWA but has a limited timeframe, or which has a temporary (even if several years) peak workload but is then expected to diminish. Any temporary programmatic increase in workload should consider the use of Limited Duration Employees (LDE) with an established, predictable separation date based upon the temporary nature of the work. In evaluating the need for additional staff, written justification for any new FTEs should address the following criteria:

Evaluation Criteria	Justification Must Address
Permanence	Is the work permanent in nature and not likely to diminish over time?
Reprioritization	Can work within the department be reprioritized to meet the new need, while reducing or
	eliminating other existing work, redeploying existing staff and negating the need to add an FTE?
Cost Effectiveness and	Is adding an FTE more cost effective over the expected life of the position's work than alternative
Budget Impact	resourcing options (e.g. temporary, LDE or contract resources)?
Full Time vs. Part Time	Does the work require a full-time position, or can the work be accomplished with a half-time
	position?
Appropriate	Can the position be filled at a lower classification and accomplish the work, while minimizing the
Classification	costs to EWA?
Institutional	Does the position require institutional knowledge that could not likely be built and sustained
Knowledge	through the use of temporary employees, LDE's, or contract resources?
Market Availability	What is the market availability and competitive landscape for the desired skill set of the
	proposed position?
Special Skills or	Are special skills or certification required to perform the work?
Certifications Required	
Risk Management and	Does the critical nature of the position, or the consequence of error or failure to effectively and
Transparency	safely perform the work make the use of outside resources impractical or too risky? Is there a
	concern for loss of transparency if outside resources are utilized?
Logistical Issues	Does the position's workplace locations, demands or duties create logistical challenges that
	make the use of temporary or contract resources impractical?

#### **Contract Administrator**

The Recommended Fiscal Year 2023 Budget includes a new Contract Administrator position to support the significant increase in the activity and complexity of EWA's contract administration, Department of Industrial Relations (DIR) compliance, legal compliance, and contract reporting. A reduction in the utilization of temporary and part-time staff partially mitigates the cost impact of this staffing recommendation. The Contract Administrator will serve as the primary technical expert for all of EWA to utilize and will be integral to EWA's quarterly and annual reporting, and forward-looking projections. The combination of these factors requires additional staffing resources in the Capital Improvements Program. The following table of justification is provided for consideration:

Evaluation Criteria	Justification
Permanence	The recommended addition of a Contract Administrator provides the needed staffing to manage increased complexity and volume of contracts being drafted, negotiated, and monitored. The reporting of these contracts, particularly to DIR, and project activity is integral to the organization's financial reporting and forward-looking projections. The Member Agency Managers have requested this additional reporting, asking for more details and transparency throughout EWA's quarterly billing, EWA's quarterly and annual projections, and EWA's reporting of each Agency's share of the contracted project costs. This position directly addresses a number of on-going concerns the Member Agency Managers have requested EWA to address.
Reprioritization	EWA runs a lean staffing model reliant on dedication and efficient effort from staff as well as support from outside consultants, extension of staff, and part-time labor. This position will be lieu of a part-time position which currently serves a similar role at an approximately 0.75 full time equivalent (FTE). Additional staff is being requested now that the volume has continued to grow beyond the capacity of the 0.75 FTE for the past several years.
Cost Effectiveness and	The additional FTE is permanent and will be partially offset by a reduction in part-time labor
Budget Impact	costs. In addition, the position will be integral to the reporting and administration of EWA's Federal Grant administration in which some of their labor costs are anticipated to be reimbursable.
Full Time vs. Part Time	EWA has utilized a part-time position for nearly five years to fulfill the organization's contract administration needs. Increasing activity and complexity requires this position to be transitioned into an FTE to properly support management of the on-going projects, administration, and contract reporting.
Appropriate	EWA's staffing structure has relied heavily on outside consultants, contractors, and part-time
Classification	staff but increased contract administration complexity and volume requires these tasks to be brought in-house to better ensure continuation of serve and management risk.
Institutional Knowledge	It takes a considerable amount of time for a contract administrator to understand all of the systems and projects currently underway and those planned in the future. However, the additional FTE will allow for a part-time position to be transitioned over and be supported by the accounting team.
Market Availability	Market competition is extremely tight and the labor pool is very limited for contract administrators. It is essential to select an individual with the right skill set and personality to complement the existing project management and operating team skill set.
Special Skills or	This position requires the ability to manage complex administration, reporting and legal aspects
Certifications Required	of contracts. The position will need to be able to work independently with use of their best judgement and limited oversight.
Risk Management and	If adequate internal controls for managing contracts is not provided, EWA must rely on the
Transparency	extension of staff and legal counsel to lead a significant portion of the effort. Without sufficient contract administration and reporting, the organization risks scheduling, budget and quality issues.

Logistical Issues	The new position will support the organization as a whole but will work directly under the finance
	team. This allows for the contract administrator to integrate contract reporting directly into
	routine processing, quarterly reporting, and projection reporting.

#### **Administrative Assistant**

The Recommended Fiscal Year 2023 Budget includes an Administrative Assistant. EWA currently has only one FTE that is dedicated to administrative support for a current staff of 72 total FTEs, that individual also provides support for miscellaneous IT systems as well so their time is not 100% dedicated to administrative functions. The addition of an Administrative Assistant will benefit all departments in the organization and relieve staff from some administrative functions thus making better use of their time. The following table of justification is provided for your consideration:

<b>Evaluation Criteria</b>	Justification
Permanence	This important position is needed to provide consistent professional staffing at EWA's front desk, support the administrative and clerical needs of the organization and support EWA's capacity to engage in projects across the facility and in the communities we serve.
Reprioritization	EWA runs a lean staffing model and takes every opportunity to reprioritize existing positions before considering adding any staff. In the past several years, EWA has placed an over reliance on temporary staffing to maintain front office coverage and administrative support for the organization. This staffing model is inefficient and routinely distracts staff from their work due to the need to train new employees two or three times a year. This disrupts the workflow which is often associated with a time sensitive schedules that must be adhered to. The temporary staffing results in constant re-training and reprioritization when the temporary staff leave for positions at other organizations that are permanent.
Cost Effectiveness and Budget Impact	The additional FTE administrative position is permanent position. The permanent position is a more cost-effective option than cycling through temporary labor, which requires retraining and loss of valuable staff time. EWA staff is spending approximately 5 months training temporary staff which costs the agency about \$31K of lost staff time and experience on training, which would be considered inefficient use of labor resources for the agency. The level of service that is required is inhibited by the lack of a permanent staff member to cover the front counter duties as well as provide administrative assistance. Until such time as it is possible to acquire a permanent administrative assistant, EWA will continue to struggle with frequent turnover which creates a situation where staff is spending time performing tasks that could be handled by a permanent position.
Full Time vs. Part Time	EWA is currently undergoing increased capital improvement projects, which in turn creates increased administrative needs for the organization. Furthermore, this position requires training and knowledge that may take a few years to fully obtain. The addition of a permanent staff member helps EWA to be more responsive to the numerous requests received from all departments including assisting with completion of paperwork, analyzing, and organizing complex documents into the records retrieval system; prepare letters, memos, reports, charts, graphs, and presentations from both verbal and written instructions to meet legislative and administrative deadlines; data entry; assisting in preparation of Board and committee agenda packages. This position will provide valuable service to all departments within the organization.
Appropriate Classification	This administrative position is an entry level position with specialize skillset to meet the needs of the agency.
Institutional Knowledge	It takes approximately 1 to 2 years of training for someone with this skillset to be able to be trained and perform at its highest potential. Having the position set at an entry level position broadens the candidate pool and should allow EWA to find a candidate that would be a good fit for the organization on a long-term basis.
Market Availability	To work in EWA's administrative department, training is required to meet the expectations of the agencies and workload. staffing this position with temporary staff has been extremely difficult due to the unprecedent job market.

Special Skills or	Knowledge of modern office methods and practices, including filing systems, receptionist
Certifications Required	techniques, business correspondence, and office equipment operation. Prepare and maintain accurate and complete records and reports; learn and interpret the laws, rules, and policies governing the operation of a joint powers authority. The ability to organize, assemble, and disseminate complex data in usable forms; the ability to establish and maintain effective communication with all staff; the ability to prepare concise written and verbal reports. Ability to utilize a variety of advisory data and information such as safety regulations, training materials, legislation/regulations, purchase orders, budgets, investment guidelines, financial statements, planning documents, meeting agendas and minutes, state statutes, procedures, and non-routine correspondence.
Risk Management and	The current staffing model is unsustainable given the increased demand for administrative
Transparency	support from all departments. Having a reliable and consistent administrative assistant in the
	office will balance workload and maintain quality service at the front desk. Without a permanent
	position for front office coverage, staffing issues will continue to arise, which will require an
	adjustment in everyone's schedule to accommodate coverage needs and reduce efficiency at all levels of the organization.
Logistical Issues	The additional FTE administrative assistant position would reduce the administrative burden on
Logistical issues	staff administrative responsibilities that currently exist. This position would report directly to the
	Administrative Assistant IV.
	Autilitistiative Assistant IV.

#### **Procurement Specialist**

The Recommended Fiscal Year 2023 Budget includes a Procurement Specialist. This position returns EWA back to a purchasing model it used several years ago which allowed for a specialist to focus on the execution of purchases, thereby allowing the Operators, Maintenance, and Administrative staff to more heavily focus on their area of expertise. The following table of justification is provided for your consideration:

<b>Evaluation Criteria</b>	Justification
Permanence	Senate Bill 854 is an unfunded mandate that requires EWA to comply with additional prevailing wage reporting requirements for public works contracts over \$1,000. Currently, field staff are required to perform the administrative tasks related to purchasing and contracts, taking time away from their core field functions where they are most effective. The unfunded mandate significantly increases that burden, further reducing the hours available for Operations and Technical Services staff to perform their specialized roles. We recommend returning to the staffing model that existed prior to 2012, when EWA had a dedicated Purchasing Specialist who supported all departments. Returning to that model will ensure greater organizational efficiency and effectiveness, and a consistent approach to complying with EWA's purchasing policy and other related contract requirements/policies. In addition, our current Inventory Control Technician is nearing retirement and this position could work closely with the Inventory Control Technician and provide cross training resource to ensure there are no disruption to inventory services. All of EWA's Member Agencies also have an FTE of the same designation.
Reprioritization	EWA runs a lean staffing model and takes every opportunity to reprioritize existing positions before considering adding any staff. Since 1995, EWA's FTE count has only increased to accommodate positions which were needed to address increased plant complexity and safety concerns. Reassigning certified staff from other facility operations is not feasible as this position has a requirement for a unique skill set and would put the mission at risk.
Cost Effectiveness and	The addition of the FTE Procurement Specialist position is permanent and will remain so for as
Budget Impact	long as EWA maintains a purchasing program. From an EWA perspective, this is a more cost- effective option than cycling through temporary labor or continuing to take time away from field staff core field functions where they could be best utilized. EWA staff currently processes over 2,000 purchase orders per year. Purchase orders require a lot of administrative reporting and specialized training in compliance with EWA's Purchasing Policy and Procedures. In addition, staff currently processes over 200 standard agreements such as design build contracts,

	professional services, technical services, and general service agreements. These agreements are technical and includes specific procurement policy language that must be followed. Contract language is complex and is not cost effective to provide continuous training to all management levels. This administrative burden reduces the amount of time that the capital improvement, operations, and technical services staff spend accomplishing field work where their time is more effectively used.
Full Time vs. Part Time	The skill set required to perform the duties of this position efficiently and accurately will take approximately two years to acquire even with prior experience in a similar role elsewhere. EWA and the operations of the plant and remote facilities have many unique systems that are uncommon to the general procurement world.
Appropriate Classification	This procurement is mid-level position that requires education, experience, certifications, and knowledge builds.
Institutional Knowledge	It takes approximately two years for a new Procurement Specialist to learn the specialized needs of the organization and legal responsibilities. Furthermore, our existing inventory control specialist is currently eligible to retire, leaving temporary non-permanent staffing as a poor long-term strategy.
Market Availability	There is significant market competition for obtaining experienced staff in the procurement job market. EWA does not anticipate finding anyone that would persist in the position as a temporary employee. Therefore, a permanent employee would stay long enough to learn the specialized needs of the agency which fit these criteria long term. Having the position set at a mid-level procurement position broadens the candidate pool and should allow EWA to find a long-term solution that would benefit the agency.
Special Skills or Certifications Required	To work in EWA's procurement department requires education, specialized procurement training and contract management experience.
Risk Management and Transparency	Knowledge of existing prevailing wage laws and practices, including indemnity, certificate of insurance requirements, risk management recommendations, contract language interpretations, competitive pricing, maintaining vendor relationships, life cycle, value, price and cost analysis through volume discounts, economies of scale, standardized specifications, and cooperative purchasing agreements.
Logistical Issues	The additional one FTE procurement specialist position would reduce the administrative burden on approximately 25 staff members. This position would report directly to the Director of Administrative Services.

#### Labor Relations Resolution # 2021-01

Standby Duty: \$1.50 / hour Shift Differential: \$2.50 / hour

Lead Operator Pay: \$2.50 / hour when in absence of Shift Supervisor

Certification Stipend: \$60 / pay period for Class B Drivers License, Crane Operator Certificate or Welding Certificate

Meal Allowance: \$15 / meal for 2+ hours of overtime

Safety Boot Allowance: \$150 - \$300 / year depending on job classification

Safety Prescription Eyewear Allowance: \$400 / year

### ENCINA WATER POLLUTION CONTROL FACILITY

The Encina Water Pollution Control Facility (EWPCF), located in Carlsbad, California, provides wastewater treatment services to approximately 377,000 residents in a 123 square mile service area of northwest San Diego County. The EWPCF consists of three major components: the treatment plant; the Encina Ocean Outfall (EOO); and the Joint Flow Metering System (JFMS). The EWPCF was constructed in 1963 to treat wastewater from the Cities of Carlsbad and Vista, with the City of Encinitas, Vallecitos Water District, Buena Sanitation District and Leucadia Wastewater District joining the partnership in the subsequent years. Since its original design and construction, the treatment plant has undergone four (4) major expansions the latest completed in 2009, and is beginning another round of construction to address reliability and aging infrastructure. Today, the EWPCF is a modern resource recovery facility that produces: clean water for recycling and Pacific Ocean discharge (via preliminary and primary treatment processes); activated sludge secondary treatment; secondary flow equalization facilities; and a 1.5 mile EOO, which discharges treated effluent at an average depth of one-hundred-fifty (150) feet; a granular fertilizer marketed under the name PureGreen (via anaerobic digesters, solids dewatering centrifuges, and a triple-pass rotary drum heat dryer); and, about 84.2% of the electricity required to power the EWPCF (via a Combined Heat & Cogeneration Power System) which allows EWA to save approximately \$1.6M in operational costs. In addition, the JFMS consists of sixteen flow meters strategically placed throughout the collection system. The data collected at these metering sites, which is analyzed and certified by an independent consultant, is a critical element in allocating EWPCF costs among the EWA Member Agencies.

Capacity – The EWPCF has a rated liquid treatment capacity of 40.51 million gallons per day (MGD) and a rated solids treatment capacity of 43.53 MGD. During FY2023, the EWPCF will: (1) clean more than 7.82 billion gallons of water; (2) recycle over 3.3 billion gallons for on-site use and regional irrigation; and, (3) process 96 million gallons of digested sludge into over 6,000 tons of PureGreen fertilizer.

Cost Allocation – The EWPCF costs are allocated among member agencies based on ownership and usage charges in accordance with the Financial Plan and Revenue Program. EOO costs are allocated among Member Agencies based on the volume of effluent discharged. JFMS costs are allocated among the Member Agencies based on the number, location and

# ENVIRONMENTAL COMPLIANCE & REGIONAL SOURCE CONTROL

The EWPCF discharges clean water to the Pacific Ocean via the Encina Ocean Outfall pursuant to a National Pollutant Discharge Elimination System (NPDES) Permit issued under the authority of the federal Clean Water Act (CWA). The CWA also covers non-domestic sources of wastewater that discharge directly to a publicly owned treatment works like the EWPCF. Such discharges may be federally regulated or regulated by EWA's Pretreatment Ordinance, which are enforced by EWA in cooperation with the host Member Agency under authority derived from the federal CWA. The goal of Encina's Regional Source Control Program is to prevent the discharge of pollutants into the Member Agency sewer system, which may interfere with the operation of the EWPCF or pass through the system and negatively impact the ocean environment, the quality of PureGreen fertilizer or the ability to reclaim water. The Source Control Program achieves this goal by: identifying regulated industries; conducting facility inspections; issuing wastewater discharge permits; sampling industrial discharges to determine compliance; taking enforcement in response to noncompliance; responding to Member Agency requests to perform investigations regarding non-routine discharges; and, conducting related public outreach activities.

**Capacity** – During FY2023 staff estimates fifty-three (53) industries will be fully permitted, while another 630 businesses will participate in EWA's Best Management Practices Program.

**Cost Allocation** – Personnel Expenses make up over 85% of Source Control's budgeted expenses. Over 82% of personnel expenses are allocated to Member Agencies based on the actual level of effort by staff. Remaining personnel expenses and all non-personnel expenses are allocated to the Member Agencies on the basis of Encina Ocean Outfall flows.

Public outreach at the 2021 Alta Vista Gardens Earth Day

### REMOTE FACILITIES

#### **AGUA HEDIONDA PUMP STATION**

The Agua Hedionda Pump Station (AHPS) is part of the Encina Joint Sewerage System and is jointly owned by the City of Vista and the City of Carlsbad. This pump station is located on the southeast shore of the Agua Hedionda Lagoon and was replaced with a new station on the existing site in FY2020. The final phase of construction to complete the new station and decommission and demolish the old station began in FY2022 with full acceptance anticipated to occur in FY2023.

**Capacity** – The new AHPS is equipped four (4) lift pumps and four (4) force main pumps, providing pumping redundancy and a broad operating range. This facility is operated 365 days a year on a 24 hour-a-day basis.

**Cost Allocation** – The AHPS is operated by EWA under a contract with the owner agencies. The costs of operating and maintaining the AHPS are allocated to the City of Vista (69.1%) and the City of Carlsbad (30.9%) in accordance with the May 2017 Memorandum of Understanding.

Agua Hedionda Pump Station

#### **BUENA VISTA PUMP STATION**

The Buena Vista Pump Station (BVPS) is part of the Encina Joint Sewerage System and is jointly owned by the City of Vista and the City of Carlsbad. This pump station is located on the southwest shores of the Buena Vista Lagoon.

**Capacity** – The BVPS, which is equipped with four (4) pumps rated at 6,000 gallons per minute and is operated 365 days a year on a 24 hour-a-day basis.

**Cost Allocation** – The BVPS is operated by EWA under a contract with the owner agencies. The costs of operating and maintaining the BVPS are allocated to the City of Vista (89.6%) and the City of Carlsbad (10.4%) in accordance with the May 2017 Memorandum of Understanding.

**Buena Vista Pump Station** 

#### **BUENA CREEK PUMP STATION**

The Buena Creek Pump Station (BCPS) is owned by the Buena Sanitation District (BSD). This pump station is located approximately two miles north of Palomar Airport Road and 1/8 mile east of Melrose Drive.

Capacity – The BCPS, which is equipped with five (5) pumps rated at 4,500 gallons per minute and is operated 365 days a year on a 24 hour-a-day basis.

**Cost Allocation** – The BCPS is operated by EWA under a contract with the BSD. 100% of the costs for operating and maintaining the BCPS are allocated to the BSD in accordance with the May 2017 Memorandum of Understanding.

**Buena Creek Pump Station** 

#### **CARLSBAD WATER RECYCLING FACILITY**

The Carlsbad Water Recycling Facility (CWRF) is owned by the City of Carlsbad via the Carlsbad Municipal Water District. The facility is located on nine (9) acres directly adjacent to the southwest border of the EWPCF.

**Capacity** – The CWRF treats EWPCF secondary effluent to meet title 22, California Code of Regulations standards for disinfected tertiary recycled water, which is conveyed throughout the City for irrigation purposes. A plant expansion completed during FY 2017 increased the plant capacity to 7 MGD.

**Cost Allocation** – The CWRF is operated by EWA under a contract with the Carlsbad Municipal Water District. 100% of the costs for operating and maintaining the CWRF are paid by the Carlsbad Municipal Water District, via the City of Carlsbad, in accordance with the May 2005 Memorandum of Understanding. Recommended expenses are based on the expected recycled water production volume. Actual expenditures will reflect the actual volume of recycled water production.

Carlsbad Water Recycling Facility

#### **RACEWAY BASIN PUMP STATION**

The Raceway Basin Pump Station (RBPS) is owned by the City of Vista. This pump station is located approximately 1/2 mile north of Palomar Airport Road and 1/8 mile west of Melrose Drive.

Capacity – The RBPS, which is equipped with three (3) pumps rated at 1,350 gallons per minute and is operated 365 days a year on a 24 hour-a-day basis.

**Cost Allocation** – The RBPS is operated by EWA under a contract with the City of Vista. 100% of the costs for operating and maintaining the RBPS are allocated to the City of Vista in accordance with the May 2017 Memorandum of Understanding.

### INTERNAL SERVICE FUNDS

Internal Service Funds (ISFs) make categorical and overhead charges to operating and capital programs. Categorical charges are costs incurred by the ISF that are directly attributable to a particular operating or capital program the ISF supports. Overhead charges are costs incurred by the ISF that support more than one operating or capital program. EWA's budget reflects three ISFs: (1) Administration; (2) Laboratory; and, (3) Energy Management. The existence of these ISFs traces back to the 1998 EWA Staffing Reorganization and management's effort to distinguish between costs required to ensure public health, produce effluent water compliant with NPDES Permit standards, and maintain the associated Encina Joint System infrastructure from costs associated with administering the Encina Joint System that could be taken on by a Member Agency or a third party administrator (Administration), permit compliance activities that could be contracted out (Laboratory), and power that could be purchased from San Diego Gas & Electric (Energy Management).

Administration – The Administration Internal Service Fund provides professional support services to EWA's Board of Directors as well as all Operating and Capital Programs. Administration plans and executes EWA's business, asset management, and financial plans; provides treasury and accountancy management; is responsible for required and supplemental financial reporting; administers all human resources functions, employee benefits, professional development, and other "Employer of Choice" initiatives; and, supports EWA's governance activities.

Laboratory – The Laboratory Internal Service Fund is responsible for monitoring and reporting activities required by: (1) EWA's National Pollutant Discharge Elimination System (NPDES) Permit; (2) permits related to facilities operated and maintained by EWA staff; (3) EWA's Storm Water Permit; and, (4) permits and contracts related to biosolids use. The Laboratory is also responsible for management of EWA's Joint Flow Metering System (JFMS), as well as the sampling and data compilation elements of EWA's Financial Plan and Revenue Program.

EWA's Laboratory, which is certified by the State of California's Environmental Laboratory Accreditation Program, analyzes over 32,000 samples per year including process control, plant influent and effluent, biosolids, industrial user samples, ocean water, storm water, and drinking water. A portion of the analyses is completed under contract for EWA's Member Agencies, which generated \$190,328 in revenue in FY2021, offsetting operating expenses.

Energy Management — The Energy Management Internal Service Fund utilizes the EWPCF's power production and heat exchange facilities to maximize the beneficial reuse of digester gas produced in the wastewater treatment process thus minimizing the amount of energy EWA must purchase to operate the EWPCF. EWPCF's Energy Management facilities generates about 12 million kilowatt hours of green electricity per year from biogas thus providing about 84.2% of the electricity required to operate the EWPCF. EWA is a member of the Environmental Protection Agency's Green Power Partnership and has been ranked in the Top 30 of the Green Power Leadership Club for On-Site Generation since 2011.

Overhaul on a 1,000 horsepower engine

**Cost Allocation** – All ISF costs and revenues are allocated internally to one or more Operating or Capital program on the basis of use. Each Operating and Capital program has its own cost allocation that apportions its net costs the Member Agencies.

71

### CAPITAL PROGRAM

The Authority's Capital Program consists of the following elements: (1) EWPCF – Capital Improvements; (2) EWPCF – Planned Asset Rehabilitation & Replacement; (3) EWPCF – Capital Acquisitions; (4) Remote Facilities – Acquisitions & Rehabilitation; (5) Five-Year Capital Improvement Plan; and (6) Twenty Year Capital Improvement Plan.

**EWPCF – Capital Improvements** – Capital Improvement Projects are those projects that increase or maintain the capacity of the Joint System and require a significant time commitment from staff. These projects regularly span multiple fiscal years and, therefore, unspent appropriations are typically carried forward by the Authority's annual Appropriations Resolution. Capital Project costs are allocated to Member Agencies based on ownership of the affected facilities. All Capital Projects are studied, designed, and executed pursuant to EWA's Comprehensive Asset Management Plan.

**Digester Sunrise** 

**EWPCF – Planned Asset Rehabilitation & Replacement** – Planned Asset Rehabilitation & Replacement projects extend the useful life of existing Joint System facilities and require a significant time commitment from staff. These projects are typically completed within a fiscal year, however, if a project cannot be completed, the Authority's annual Appropriations Resolution will identify unspent appropriations to be carried forward. Planned Asset Replacement costs are allocated based on ownership of the affected facilities.

**EWPCF** – **Capital Acquisitions** – Capital Acquisitions include the purchase of new items and minor facility projects that maintain the capacity and useful life of existing Joint System facilities. Expenditures are allocated based on the benefiting program or internal service fund.

Remote Facilities – Acquisitions & Rehabilitation – Remote Facility Acquisitions and Rehabilitation include the purchase of new items and minor facility projects that maintain the capacity and useful life of existing remote facilities operated by the Authority. Expenditures are allocated based on ownership of the affected facilities.

# CAPITAL PROGRAM (cont.)

#### LONG TERM CAPITAL IMPROVEMENTS

**Five-Year Capital Improvement Plan** – The Five-Year Capital Improvement Plan includes expenditure projections for current and planned projects expected to require additional appropriations through FY2027, as identified by EWA's Comprehensive Asset Management Plan (CAMP) documents. The Five-Year Capital Improvement Plan is developed and sequenced pursuant to EWA's Comprehensive Asset Management Plan.

Twenty-Year Capital Improvement Plan – The Twenty-Year Capital Improvement Plan includes expenditure projections for current and planned projects expected to require additional appropriations through FY2042.

As planning reports are updated or other information becomes available, the long-term financial schedules may be revised. Capital Programs may also be modified due to unanticipated wastewater service requirements by one or more Member Agencies, cost inflation, changes in local population and development growth patterns, and new regulatory requirements.

### **SUMMARY of CAPITAL**

	Actual FY2021 *	Budget FY2022	Recommended FY2023
EWPCF – Capital Improvements	\$ 21,584,452	\$ 16,454,000	\$ 20,900,000
EWPCF – Planned Asset Rehabilitation & Replacement	\$ 914,788	\$ 1,101,000	\$ 1,156,000
EWPCF – Capital Acquisitions	\$ 264,961	\$ 349,000	\$ 356,000
Remotes Facilities – Acquisitions & Rehabilitation	\$ 1,473,545	\$ 2,488,500	\$ 1,681,800
Subtotal	\$ 24,237,746	\$ 20,392,500	\$ 24,093,800

### **RESOLUTION NO.**

# RESOLUTION OF THE BOARD OF DIRECTORS OF THE VALLECITOS WATER DISTRICT APPROVING THE FISCAL YEAR ENDING IN 2023 BUDGET OF THE ENCINA WASTEWATER AUTHORITY IN ACCORDANCE WITH THE JOINT POWERS BASIC AGREEMENT

WHEREAS, the Vallecitos Water District is a party to the Encina Joint Powers Basic agreement entered into on July 13, 1961, for the acquisition, construction, ownership, operation, and maintenance of the Encina Joint Sewer System; and

WHEREAS, the Encina Basic Agreement requires approval of the budget of the Encina Wastewater Authority (EWA) by the member agencies following the recommendation of the Joint Advisory Committee (JAC); and

WHEREAS, the JAC thereafter approved the Fiscal Year 2023 budget of the EWA on April 27, 2022; and

WHEREAS, the Board of Directors of the Vallecitos Water District desires to approve said budget and provide for payment of its share of such expenses in accordance with the allocation provided in the Basic Agreement as modified;

NOW, THEREFORE BE IT RESOLVED by the Board of Directors of the Vallecitos Water District as follows:

SECTION 1: The fiscal year ending in 2023 capital budget of the EWA, as approved by the JAC on April 27, 2022, in the amount of \$27.0 million is hereby approved.

<u>SECTION 2</u>: The fiscal year ending in 2023 operating revenue and expense budget of the EWA, as approved by the JAC on April 27, 2022, in the amount of \$19.5 million is hereby approved.

<u>SECTION 3</u>: The Vallecitos Water District General Manager is hereby authorized to make payments on behalf of this agency to EWA in accordance with the budget, as approved by the JAC, and in accordance with the Encina Basic Agreement.

<u>SECTION 4</u>: A certified copy of this resolution shall be forwarded to EWA immediately upon its approval.

PASSED,	APPROVED	AND	ADOPT	ED	by	the	Board	of	Direc	ctors	of	the
Vallecitos Water	•	pecial	meeting	held	on	the 1	10 <sup>th</sup> day	of	May,	2022,	by	the
following roll call	vote:											

AYES: NOES: ABSTAIN: ABSENT:

> Craig Elitharp, President Board of Directors Vallecitos Water District

ATTEST:

Glenn Pruim, Secretary Board of Directors Vallecitos Water District DATE: MAY 10, 2022

TO: BOARD OF DIRECTORS

SUBJECT: VALLECITOS WATER DISTRICT FISCAL YEAR 2022/2023 BUDGET

**UPDATE** 

### **BACKGROUND:**

The Finance Committee met to discuss the budget at three meetings between February 15, 2022, and April 11, 2022. At each Committee meeting, the budget, or parts thereof, was reviewed and input from the Committee members received and incorporated in the draft budget.

### **DISCUSSION:**

The purpose of this presentation is to provide an update to the full Board on the budget process including a detailed review of the following topics:

- Budget Calendar for fiscal year 2023
- Budget to actual results last 5 years
- Operating budget requests
- Preliminary salaries and benefits
- · Capital budget requests

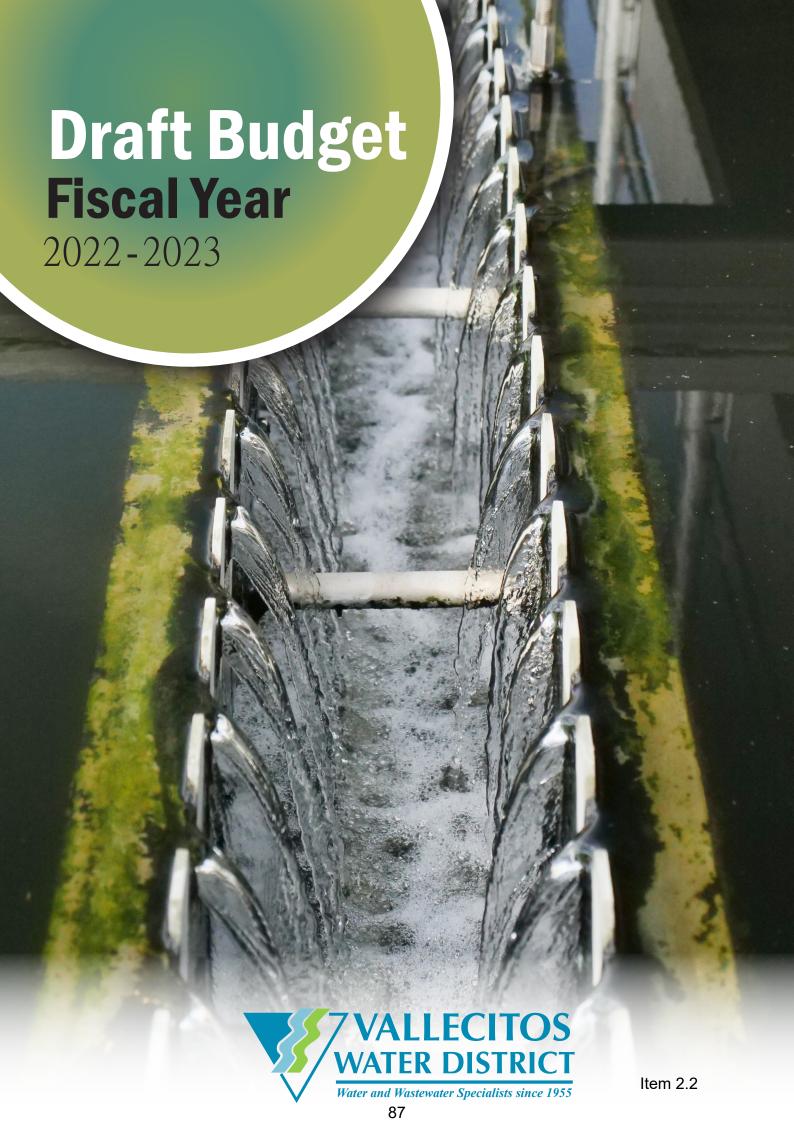

Staff hopes to incorporate any requested changes from the Board and intends to bring a draft proposed budget to the Board meeting on May 19, 2022. The final recommended budget will be brought to the Board for approval on June 1, 2022.

### **RECOMMENDATION:**

For information and discussion only.

### **ATTACHMENTS:**

- 1. Vallecitos Water District Draft Budget for Fiscal Year 2022-2023
- Draft Water Materials & Services 2023
- 3. Draft Sewer Materials & Services 2023.

### **Our Mission**

### The water and wastewater specialists - providing reliable and sustainable services.

This mission of reliable and sustainable services is reflected in this budget and in the attitudes and commitment of the Vallecitos Water District staff and Board Members.

Clockwise: Tiffany Boyd-Hodgson, Craig Elitharp (center), Jim Pennock, Mike Sannella and James Hernandez

Board of Directors
Craig Elitharp, President
James Hernandez, Vice President
Mike Sannella
Tiffany Boyd-Hodgson, Ph.D.

Jim Pennock

Vallecitos Water District is a public agency organized in 1955, proudly serving the City of San Marcos, portions of Escondido, Carlsbad, Vista, and the surrounding unincorporated areas.

### **BUDGETARY CONSIDERATIONS**

### **Mission Statement**

The water and wastewater specialists - providing reliable and sustainable services.

The budget reflects the mission statement

### **Budgetary Approach**

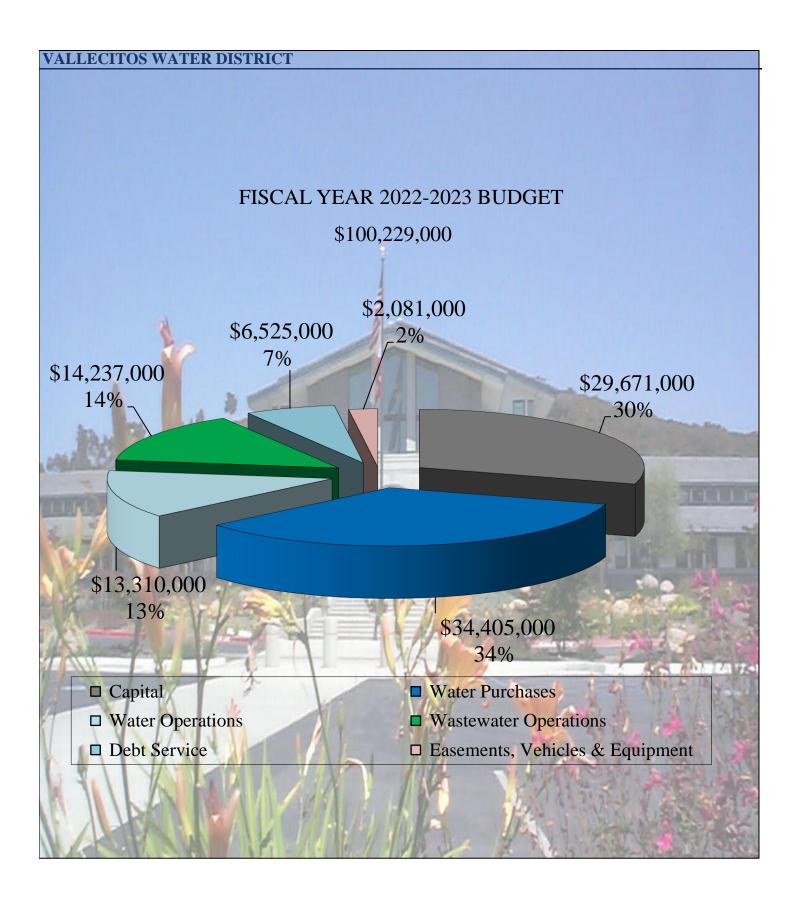

Governmental agencies, such as cities and counties, usually approach their budgets from the "revenue end." Since their revenues are somewhat predictable and restricted, their budgetary considerations are based on setting a level of service (expense total) that can be attained with those available funds.

A special district, however, must make a more thorough analysis. Normally, the expenses can be determined with a high degree of accuracy, and it's the revenues that must be set to cover those expenses. To complicate matters, factors such as weather variability and customer usage habits can have a profound effect on the overall revenue projection.

### Operations vs. Capital Budget

The budget is designed to ensure various revenues and fees are used as intended. The Operations Budget, which covers the ongoing cost of running the District, is paid by the rate payers of the District through charges for water and sewer service. The Capital Facilities Budget is covered primarily by fees on new development and existing customers with increased demands.

Operating revenue in excess of operating expense is earmarked for transfer to the Replacement Reserve Fund for the future replacement of assets. This ensures the current users of our system are paying their fair share for the maintenance of existing facilities as they depreciate.

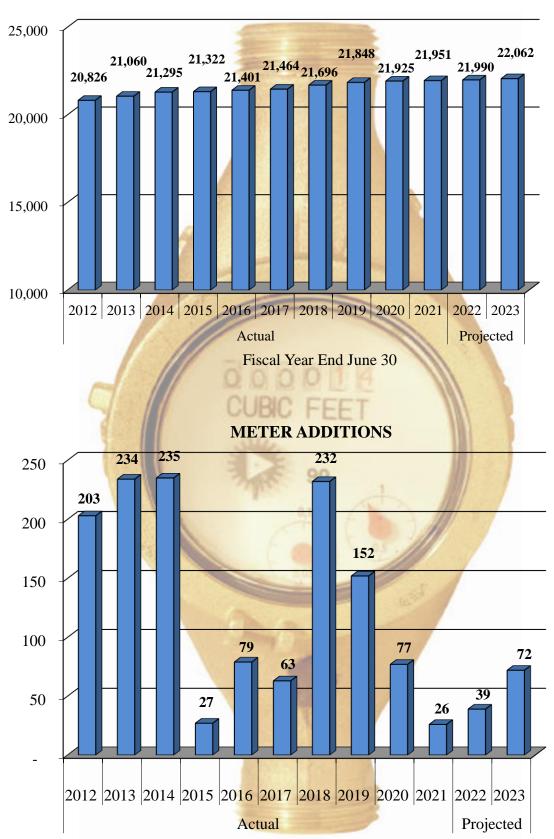

# 2022-23 OPERATING BUDGET WATER

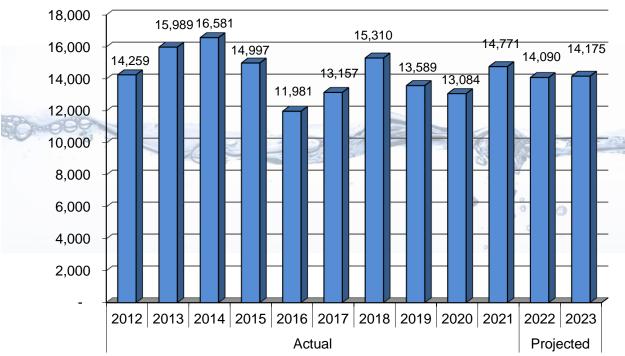

Double Peak Tank

### **METERS IN SERVICE**

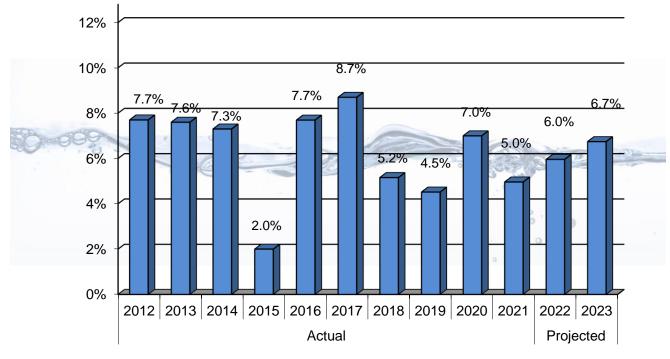

Fiscal Year End June 30

### **WATER SALES IN ACRE FEET**

Year End June 30

### **UNBILLED WATER**

Year End June 30

Unbilled Water includes one-day permit use, tie-ins, operational use, fire hydrant damage and use, meter malfunctions, leaks, and timing differences

-5- Item 2.2

### FUNCTION DEFINITIONS - WATER OPERATIONS

#### **REVENUES**

<u>Water Sales</u>: Monthly charges to cover the wholesale cost of water, with a minimal markup targeted to cover some operating costs and provide funds for capital improvements and replacement.

<u>Ready To Serve</u>: Monthly charge to cover fixed costs, regardless of water sales. Examples include maintenance of reservoirs and transmission lines, meter reading and administrative costs such as insurance.

<u>Pumping Charges</u>: Charges to customers at high elevations, to cover the power costs required to deliver water.

<u>Interest and Other</u>: Interest revenue, late charges, backflow fees, engineering fees and other miscellaneous revenues.

### **OPERATING EXPENSES**

<u>Water Purchases:</u> Vallecitos purchases its water from two sources: The San Diego County Water Authority (SDCWA) and the Olivenhain Municipal Water District. Desalinated water is included in the water purchased from SDCWA.

<u>Pumping</u>: To move water to various elevations, and to provide adequate pressure and storage to higher service connections. Includes maintenance of ten pump stations, readings, and power costs.

<u>Water Quality</u>: To monitor incoming water in accordance with federal and state regulations. Includes collecting samples and reporting results, and maintenance of monitoring equipment.

<u>Water Treatment</u>: To treat water in tanks, handle chemicals, and use and maintain injection equipment for pipelines.

<u>Tanks and Reservoirs</u>: Maintenance of 17 steel tanks and 2 reservoirs. Includes corrosion control, security, and water level monitoring.

<u>Transmission and Distribution</u>: Maintenance of pipeline system within 45 square miles, consisting of 379 miles of pipes. Includes 26 pressure reducing stations, 3 (internal) flow control facilities, all air releases/blow-offs, fire hydrant laterals (not including the hydrant), cross-tie valves with other districts, and valve exercising.

Services: Maintenance of all service lines located from main lines to meters.

### FUNCTION DEFINITIONS - WATER OPERATIONS (Continued)

<u>Meters:</u> Reading approximately 22,000 meters monthly for billing purposes as well as maintenance of all customer meters.

<u>Backflow Prevention</u>: Ensures compliance with Title 17, requiring backflow devices for specific connections to protect quality of water in our system.

<u>Customer Accounts</u>: Costs related to opening and closing accounts, response to customer concerns, billing costs (statements, mailing), and uncollectible accounts.

<u>Equipment and Vehicles</u>: Maintenance of District equipment. Includes all construction equipment, water, sewer and administrative vehicles, plus miscellaneous tools and equipment.

<u>Buildings and Grounds</u>: Maintenance of administrative and operations buildings, warehouse, and shops. Also includes power costs, alarmed security system, landscape service, janitorial, and pest control.

<u>Engineering</u>: All costs of engineering, capital facilities and inspection services. Includes review and monitoring of development to ensure compliance with standard design practices, impact on existing system and environment, and orderly planning to provide adequate water and sewer service as demand dictates.

<u>Safety and Regulatory Affairs</u>: Program to control unnecessary risks, hazardous conditions, and unsafe practices, and minimize physical losses, personnel injuries, and District liability, and to provide for regulatory compliance in environmental, public health and other mandated areas.

<u>Information Technology</u>: Centralization of the District's technology to maintain hardware, software, servers, networks, and interfaces.

### General and Administrative

### Cost of Labor:

- *Salaries* include administrative and conservation personnel salaries and all vacation, sick leave, and holiday time for administrative and water personnel.
- *Group Insurance* is health, vision, and dental costs for all administrative and water personnel.
- Workers' Compensation Insurance costs for all administrative and water personnel.
- Public Employees Retirement System (PERS) participation costs for all administrative and water personnel.
- *Social Security* costs for all administrative and water personnel.

### FUNCTION DEFINITIONS - WATER OPERATIONS (Continued)

### General and Administrative (continued)

• *Other Taxes/Benefits* includes unemployment and other miscellaneous employee taxes and benefits such as annual luncheon, and awards for all personnel.

*District Insurance* premium costs protect District assets, such as buildings and vehicles, and provide liability coverage for potential claims.

Outside Services are provided by consultants and temporary help.

Legal costs are incurred for general legal counsel (presence at board meetings, contracts, employment issues, etc.)

Auditing is conducted by a certified public accounting firm to provide an opinion on the annual financial report.

Banking Services are provided to maintain the District's general checking account plus trust and custody services.

Office Supplies are purchased for necessary administration of the District including office equipment costing less than the capitalization threshold.

*Postage* not related to public relations or customer billing includes notifications, such as shutdowns and public hearing notification mailings.

Office Equipment Repair covers maintenance contracts on computer system, billing equipment, copiers, telephone system, and other repairs as needed.

*Telephone* costs are for service at administration and water operations, long distance, data lines, and cellular phone service for field and key personnel.

*Travel* costs are for administrative and water personnel.

*Meetings and Seminars* for administrative and water personnel provide District representation and professional development.

*Dues and Subscriptions* are for memberships and periodicals to various organizations, such as American Water Works Association (AWWA).

*Public Awareness/Conservation* is the "image and information" arm of the District, utilizing publications, special events, the speakers' bureau, and the VWD School Program to present Vallecitos as the "Water and Wastewater Specialists" and promote effective water conservation programs.

### FUNCTION DEFINITIONS - WATER OPERATIONS (Continued)

### General and Administrative (continued)

Regulatory Fees are incurred for renewal fees for personnel certifications such as water distribution and treatment, notary, and professional memberships, state regulatory agencies, and other compliance matters.

Election and Annexations facilitation costs are assessed by the County.

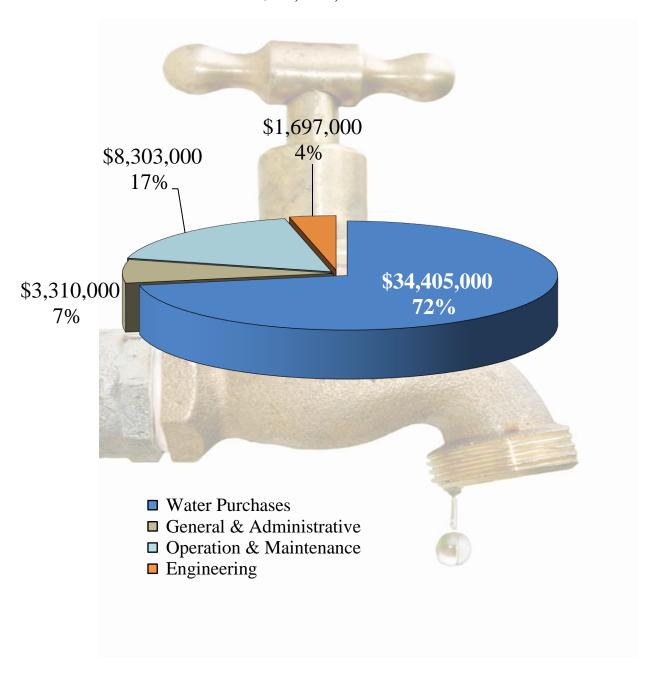

*Director Fees* are paid for attendance of board meetings, professional conferences, and other District-sanctioned organizations.

*Director Expenses* include all costs incurred by Directors, such as travel reimbursement and conference fees.

Other/Mandated Reimbursements include miscellaneous expenses that do not specifically apply to any of the above-referenced categories less mandated cost reimbursements due from the State.

Administrative Credit Transfer is a collection or recovery of overhead costs that are applied to all construction work orders.

2022-23 WATER OPERATING EXPENSE BUDGET \$47,715,000

# 2022-23 OPERATING BUDGET WASTEWATER

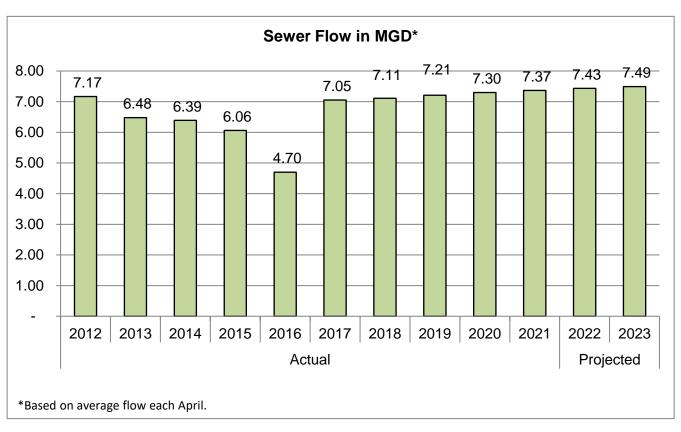

Chlorine Contact Tank at Meadowlark Wastewater Reclamation Facility

-17-

#### BUDGET FOR THE YEAR ENDING JUNE 30, 2023

#### FUNCTION DEFINITIONS - WASTEWATER OPERATIONS

#### REVENUES

<u>Sewer Service</u>: Monthly charges to cover the cost to collect, treat and dispose of wastewater plus maintain the various wastewater facilities.

<u>Reclaimed Water Sales</u>: Revenue generated from contractual sale of reclaimed water to the Carlsbad Municipal Water District and the Olivenhain Municipal Water District on a cost recovery basis.

Other: Interest revenue, late charges, engineering fees and other miscellaneous revenues.

#### **OPERATING EXPENSES**

<u>Collection and Conveyance</u>: Maintaining flow in 276 miles of District sewer lines. Includes blockage removal, television inspection, and maintenance of pipeline system and manholes.

<u>Lift Stations</u>: Cost of lifting sewage flows at the Montiel Lift Station, Lake San Marcos Lift Station and Questhaven Lift Station. Includes maintenance and power costs of the pumping systems.

<u>Source Control</u>: Costs to ensure compliance with federal, state, and local regulations as administered through the Encina Wastewater Authority.

<u>Encina Disposal</u>: Cost reimbursement to the Encina Wastewater Authority for processing wastewater and returning clean water to the environment.

<u>Meadowlark Plant</u>: All costs attributed to treating wastewater and for production and sale of reclaimed water to City of Carlsbad, and OMWD including operation and maintenance of the plant, No. 1 Lift Station, and Mahr Reservoir.

<u>Customer Accounts</u>: Responds to customers, associated billing costs, and uncollectible accounts.

<u>Equipment and Vehicles</u>: Maintenance of sewer vehicles and equipment and transfer of a portion of administrative and water operations vehicle costs attributable to sewer.

Buildings and Grounds: A transfer of costs attributable to sewer.

Engineering: All attributable sewer engineering, capital facilities and inspection costs.

#### BUDGET FOR THE YEAR ENDING JUNE 30, 2023

### FUNCTION DEFINITIONS - WASTEWATER OPERATIONS (Continued)

<u>Safety and Compliance</u>: A transfer of safety and regulatory affairs costs attributable to sewer operations.

<u>Information Technology</u>: Centralization of the District's technology to maintain hardware, software, servers, networks, and interfaces.

### General and Administrative

#### Cost of Labor:

- Salaries include all vacation, sick leave, and holiday time for sewer personnel.
- *Group Insurance* is health, vision, and dental costs for all sewer personnel.
- Workers' Compensation Insurance covers all sewer personnel.
- Public Employees Retirement System (PERS) participation costs for all sewer personnel.
- Social Security cost for all sewer personnel.
- Other Taxes include unemployment and other miscellaneous employee taxes for sewer personnel.

*Travel* costs for sewer personnel.

*Meetings and Seminars* fees for sewer personnel are to provide District representation and professional development.

Dues and Subscriptions are periodical costs for sewer-related activities.

Other includes miscellaneous expenses that do not specifically apply to any of the above-referenced categories.

Administrative Credit Transfer is the collection or recovery of overhead costs that apply to all construction work orders.

# **VALLECITOS WATER DISTRICT** 2022-23 WASTWATER OPERATING EXPENSE BUDGET \$14,237,000 \$2,684,000 19% \$6,219,000 44% \$3,784,000 26% \$1,550,000 11% ■ Encina & Meadowlark Plant ■ General & Administrative □ Operation & Maintenance ■ Collection & Conveyance

<sup>\*</sup> There is also a labor overhead charge to work orders to cover benefit costs which are a part of the credit in the General and Administration sections of Water and Wastewater operations.

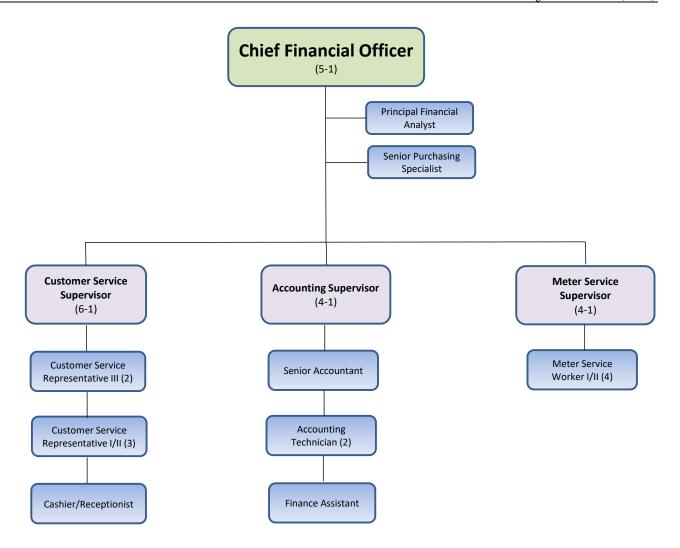

#### 2022-23 PERSONNEL BUDGET

#### POSITIONS/PERSONNEL:

Management will scrutinize the need for all positions and only fill positions if absolutely necessary. The fiscal year 2022-23 budget includes 3 retitles as outlined below. There are no new positions or reclassifications.

#### **RETITLES:**

<u>Finance Manager to Chief Financial Officer</u> - Estimated Annual Cost: \$0 This is a retitle only and will have no fiscal impact as there is no salary change.

<u>Application Specialist I to IT Business Analyst I</u> - Estimated Annual Cost: \$0 This is a retitle only and will have no fiscal impact as there is no salary change.

<u>Application Specialist II to IT Business Analyst II</u> - Estimated Annual Cost: \$0 This is a retitle only and will have no fiscal impact as there is no salary change.

#### 2022-23 PUBLIC AWARENESS AND CONSERVATION PROGRAM BUDGET

#### **REBATE PROGRAMS \***

Prj 2023100064

W/O 117447

W/O 117448

To encourage the purchase of qualified low flow devices, appliances, artificial turf or rebates to customers who remove their existing truf grass and install a low-water landscape (i.e., Cash for Grass program.)

1,000

\$

#### **OUTREACH & ADVERTISING**

Prj 2023100065

For purchase of items and services used to assist customers in becoming better informed about water related issues. Includes but not limited to: purchase of videos, books, displays and promotional items; advertising; cost to participate in community events; employee education; and to provide tours of District facilities. Includes cost to produce and mail newsletters, consumer confidence report, brochures, bill inserts, special hearing notifications, and others as needed.

52,900

#### VIDEO PRODUCTION

Pri 2023100066

W/O 123555

Cost to hire outside production company to produce videos highlighting the District or for internal staff to purchase supplies and services to create videos. Videos to be shown during tours of the District, speaking engagements, on the VWD website and/or on social media

9,900

#### **EDUCATION**

Prj 2023100067

W/O 117451

For continued development and purchase of materials designed to promote and implement K-12 education programs. This includes the Splash Science Mobile Lab visits to area elementary schools and payment for bus transportation to Jack's Pond Park and Heritage Park to listen to educational water history information by District staff. Also includes bus transportation for school tours of the District. Includes materials and costs to participate in annual Water Awareness Campaign (4th grade calendar/poster contest), such as the purchase of calendars, entry forms, prizes for entrants and poster contest winners. Also includes participation in Palomar College GEAR UP program.

41,500

#### **COOPERATIVE PROGRAMS\***

Pri 2023100068

W/O 117452

For participation in cost-sharing programs such as residential surveys; large property audits, which are outsourced due to extensive staff time that would be required; customer service surveys; and supplies such as dye tablets, showerheads and moisture probes.

3,000

#### WATERWISE LANDSCAPE

Prj 2023100069

W/O 117453

To promote low water use landscape and irrigation practices. Includes the cost for sponsoring, maintaining and upgrading waterwise demonstration gardens\*\*, landscape irrigation/plant selection workshops, signage and promotion of demonstration gardens, waterwise plant promotions, and purchase of waterwise landscape brochures and publication reprints.

\*\* Demonstration gardens include: Sustainable Demonstration Garden at VWD Administration building, Heritage Park native plant garden and Jack's Pond Park native plant garden.

7,300

#### MEMBERSHIPS & EQUIPMENT Pri 2023100070

W/O 117454

To maintain memberships in related organizations and committees and for the purchases of new or replacement equipment.

2,400

#### COMMERCIAL/INDUSTRIAL

Pri 2023100071

To assist large commercial and public agency customers by providing workshops, written materials, monetary incentives, and using outside consultants.

1,000

#### TOTAL PUBLIC AWARENESS/CONSERVATION PROGRAM BUDGET

119,000

-33-Item 2.2

<sup>\*</sup> Uncertainty in the funding from the Metropolitan Water District may adversely impact the availablity of programs.

## Capital Improvement Program Land Outfall Parallel Sewer Section A

**Description:** The existing 20 to 24-inch Siphon Section A, and 30-inch Gravity Section A of the Land Outfall are under capacity and will require a parallel 30-inch siphon pipeline and a new 42-inch gravity pipe to be installed.

Project Manager: Ryan Morgan Department: Engineering

**Project:** 2021100002 **Funding Source:** 76% Fund 220 – Sewer Capacity 24% Fund 210 – Sewer Replacement

Comments: The Land Outfall comprises approximately 34,000 feet of sewer pipe (total) installed in 1985, connecting Lift Station No. 1 to the Encina Water pollution Control Facility. The Siphon Section A comprises approximately 12,000-feet of 20 to 24-inch ductile iron pipe (DIP) and operates as a pressurized inverted siphon. The Siphon Section A corridor begins just west of Acacia Drive and ends just east of El Camino Real. Currently Siphon Section A is overcapacity during peak wet weather flow conditions. A 30-inch siphon pipeline, parallel to Siphon Section A, needs to be installed to provide additional capacity and to accommodate ultimate build out demands. A diversion structure between the existing siphon and the new parallel siphon will be necessary. Additionally, this project will include a meter vault with pipeline interconnects west of Melrose Avenue, a new connection to the solids forcemain, and connection to the City of Carlsbad's Poinsettia lift station.

Approximately 1,625 feet of existing 30-inch vitrified clay pipe (VCP), referred to a Gravity Section A, was installed in 1985 as part of the 34,000-foot Land Outfall project, located immediately east of Siphon A. Gravity Section A is currently under capacity for build out demands and will need to be replaced with new 42-inch PVC.

**Operations Impact:** Reduce the risk of sewer spills. Increase capacity. Routine maintenance.

#### **Project Spending Plan**

Project Phase	Previous Spending	FY 22/23	FY 23/24	FY 24/25	FY 25/26	FY 26/27 & Thereafter	Total

### Capital Improvement Program Land Outfall Gravity Sewer Section D

**Description:** Gravity Section D of the Land Outfall consists of pipeline sections under capacity during current or build out conditions and will need to be upsized to new 36-inch to 48-inch PVC pipes.

Project Manager: Ryan Morgan Department: Engineering

**Project:** 90001 Funding Source: 20% Fund 220 - Sewer Capacity

Work Order: 090001 80% Fund 210 - Sewer Replacement

Comments: The Land Outfall comprises approximately 34,000 feet of sewer pipe (total) installed in 1985, connecting Lift Station No. 1 to the Encina Water pollution Control Facility. A portion of the Land Outfall, referred to as Gravity Section D, is made up of approximately 12,800 feet of sewer pipe ranging in size from 30 to 39-inch from east of Interstate 5 to the end of Siphon C, located near Palomar Oaks Way and Camino Vida Roble. Approximately 7,900 feet of Gravity Section D is currently under capacity and needs to be upsized to new 36-inch to 48-inch PVC pipelines. Approximately 4,900 feet of Gravity Section D may need to be upsized to new 36-inch to 42-inch PVC pipelines to provide additional capacity to meet build-out demands. The District will work with other interested agencies (City of Carlsbad, Buena Sanitation District & City of Vista) when possible in pursuit of cost-sharing alternatives. After project completion, the District estimates \$3,515,000 will be received in reimbursements.

The existing Land Outfall capacity ownership percentages for Section D for the three agencies are:

Carlsbad 23.98% Vista 17.99% VWD 58.03%

**Operations Impact:** Reduce the risk of sewer spills. Increase capacity. Routine maintenance.

#### **Project Spending Plan**

Project Phase	Previous Spending	FY 22/23	FY 23/24	FY 24/25	FY 25/26	FY 26/27 & Thereafter	Total

# **Capital Improvement Program Montiel Lift Station and Forcemain Replacement**

**Description:** The Montiel Lift Station and the discharge forcemain have surpassed the end of their design life and require replacement. In addition, the lift station is undersized to handle peak wet weather build out flows for the area.

Project Manager: Ryan Morgan Department: Engineering

Project: 2020100002 Funding Source: 51% Fund 210 – Sewer Replacement

Work Order: 217904 49% Fund 220 – Sewer Capacity

Comments: The Montiel Lift Station is a small facility just north of State Route-78 and east of Nordahl Road. This lift station was constructed in 1985 and was originally designed to serve as a temporary purpose. The lift station collects and conveys wastewater flows from a 200-acre area east of Nordahl Road near the District's eastern service area boundary. The lift station's discharge consists of 1,830-feet of 6-inch diameter ductile iron pipe (DIP) forcemain which has surpassed the end of its design life. The District has prepared a planning document and determined that a gravity outfall solution, in partnership with the City of Escondido will not be realized. This project is identified in the 2018 Master Plan as Project LS-1.

The existing forcemain discharge connection to the gravity manhole in Nordahl Road will be replaced as part of this project. An additional 2,350 feet of forcemain piping may be included downstream of this location to reduce the quantity/cost of future CIP replacements of the existing gravity sewer in the Nordahl Shopping Center. Additional replacements of existing 10" diameter DIP influent gravity sewer segments upstream of the lift station may be replaced. Applying these project components under one scope of work presents an estimated savings of over \$1,000,000 compared to executing individually as separate capital improvement projects.

**Operations Impact:** Routine monitoring and maintenance.

#### **Project Spending Plan**

Project Phase	Previous Spending	FY 22/23	FY 23/24	FY 24/25	FY 25/26	FY 26/27 & Thereafter	Total
Planning	\$375,000						\$375,000
Design	\$585,000	\$75,000					\$660,000
Construction		\$2,781,000	\$3,399,000				\$6,180,000
Total	\$960,000	\$2,856,000	\$3,399,000	\$0	\$0	\$0	\$7,215,000

FY 2022/23 Budget Request - \$1,635,000

Project Approval	Planning		Design		Construction		Completion
	Begin	End	Begin	End	Begin	End	
Jul 2019	Feb 2016	Jul 2021	Jan 2020	Sep 2022	Dec 2022	Dec 2023	Jan 2024

# Capital Improvement Program Tres-Amigos Water Line Replacement Phase 1

**Description:** Replace approximately 7,800 feet of the Tres-Amigos thin-wall steel water line. The aging 6-inch to 8-inch steel pipe will be replaced with new PVC pipe.

Project Manager: Ryan Morgan Department: Engineering

**Project:** 2020100003 Funding Source: 100% Fund 110 – Water Replacement

Work Order: 226509

Comments: The Tres-Amigos water line consists of of approximately 19,000 feet of pipelines ranging from 6-inch to 12-inch diameter. The water pipelines located in the northern limits of VWD boundary were installed in the 1950s and 1960s, extending from the North Twin Oaks Tank No. 2 in Pleasant Heights Drive to north of Carrio Drive. The original Tres Amigos Line Extension Project occurred in 1958 which installed 6-inch and 8-inch diameter tar wrapped 12-14-gauge steel pipelines. This material is considered steam pipeline and is not adequate for use in pressurized water distribution systems. The Project will design the replacement of existing 6-inch and 8-inch diameter steel water mains with 8-inch (minimum) diameter C-900 PVC water pipeline.

Due to the frequency of pipeline ruptures, this project will replace approximately 7,800-feet of the Tres Amigos water pipelines beginning at the tee junction in Green Hills Way, traveling northbound in VWD easements and in Ormsby Way. The pipeline corridor veers east in an existing VWD easement from Ormsby Way and travels northbound in alignment with Fairview Drive and crosses Gopher Canyon Road, continuing northbound in Fairview Drive. North of the Carrio Drive/ Fairview Drive intersection, the pipeline travels northeast in VWD easements through private properties to a deadend at VWD's northern boundary (end of Project). A key Project objective includes the relocation of the existing pipelines out of private backyards and into more accessible areas.

**Operations Impact:** Reduced risk of water line breakage. Annual and routine pipeline maintenance is expected with the completion of this project.

#### **Project Spending Plan**

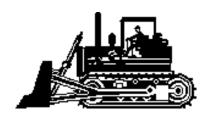

Project Phase	Previous Spending	FY 22/23	FY 23/24	FY 24/25	FY 25/26	FY 26/27 & Thereafter	Total

# **Capital Improvement Program Chlorine Contact Tank Expansion**

**Description:** Expand the existing Chlorine Contact Tank (CCT) at the Meadowlark Water Reclamation Facility (MRF) from 5 million gallons a day (MGD) to 6.5 MGD. Evaluate updating CCT process to utilize Ultraviolet Sterilization.

Project Manager: Ryan Morgan Department: Engineering

Project: 2016100002 Funding Source: 100% Fund 250 - Reclaimed

Work Order: 167177

**Comments:** The existing CCT were part of the original expansion of MRF in the 1980's. During the latest expansion of MRF which started in 2005, the CCTs were re-rated to handle the expanded flow but were not updated. Currently the CCTs remain one of the bottlenecks in the process at MRF.

Chlorine contact tanks (CCTs) at Meadowlark Water Reclamation Facility (MRF) can process up to 5 million gallons per day (MGD) of reclaimed water; all of the other treatment components at MRF has the ability to process up to 6.5 MGD. This was identified in the draft Nutrient Removal Study, which indicated that MRF has the ability to increase the daily treatment capacity to 6.5 MGD. The District as a member of the North San Diego County Water Reuse Coalition secured a grant of \$90,000 under Prop 84, awarded by the State Water Resources Control Board (SWRCB). The District is seeking 25% Grant funding for the project budget total. Reimbursement for project costs will also be acquired from current recycled water customers (City of Carlsbad and Olivenhain Municipal Water District) through the Recycled Water Rates. Construction of the CCT expansion will be contingent on acquiring these grant funds and reimbursement agreements. The net result will be 'no cost' to the District.

**Operations Impact:** Normal maintenance.

**Project Spending Plan** 

Project Phase	Previous Spending	FY 22/23	FY 23/24	FY 24/25	FY 25/26	FY 26/27 & Thereafter	Total

# **Capital Improvement Program MRF Conversion to Sodium Hypochlorite**

**Description:** Replace the use of chlorine gas at the Meadowlark Water Reclamation Facility (MRF) with bulk storage of sodium hypochlorite (bleach) and perform a structural retrofit to meet the current State seismic standards for buildings.

Project Manager: Ryan Morgan Department: Engineering

Project: 2017100002 Funding Source: 100% Fund 250 - Reclaimed

Work Order: 213334

Comments: The Meadowlark Water Reclamation Facility (MRF) currently uses 100% chlorine gas as a disinfectant in order to meet State regulations for reclaimed water. Chlorine gas is an acute hazard that presents a danger to District staff and the immediate area. Use of this gas requires the District to maintain several expensive State and Federal safety programs, equipment, and a Hazardous Materials response team; requiring a considerable amount of staff time. The conversion to bulk storage of sodium hypochlorite removes the acute hazard of chlorine gas and replaces it with a bleach solution (12.5%) that removes the District's requirement to maintain several of the extensive safety programs for that site. Use of the bleach will not create an acute hazard in the event of a leak.

The project will proceed with an agreement from the Recycled Water customers (City of Carlsbad and OMWD) to reimburse the District through Recycled Water rates.

During the Process Hazard Analysis of 2019, ventilation openings in the Chlorine Building were identified as having seismic deficiencies. These deficiencies need to be seismically retrofitted to the current building code.

**Operations Impact:** Removal of an acute hazard. Reduction in regulatory requirements and staff time at the Meadowlark Reclamation Facility. Economic benefit of no longer needing to import chlorine gas or maintain a HazMat team. Routine maintenance.

### **Project Spending Plan**

# Capital Improvement Program Meadowlark Failsafe Rehabilitation (Buena Reach)

**Description:** This project will install manholes to provide access to the pressured system for cured-in-place pipe rehabilitation, repair, and/or replacement alternatives.

Project Manager: Ryan Morgan Department: Engineering

**Project:** 2020100005 Funding Source: 100% Fund 210 – Sewer Replacement

Work Order: 232898

Comments: The Meadowlark Failsafe Sewer Outfall is composed of approximately 9,900 feet of 16-inch ductile iron pipe (DIP) installed in 1980 from Aviara Parkway and Palomar Airport Road to Yarrow Road and Camino Vida Roble in Carlsbad. Recent repairs in the Buena Reach have determined that there is a significant need to improve the condition of this pipeline. This project will install manholes to provide access to the pressured system to allow for the identification of structural and flow capacity deficiencies and recommend potential cured-in-place pipe rehabilitation, repair, and/or replacement alternatives.

Buena Sanitation District is responsible for 50% of any repairs or improvements in the Buena Reach and a letter agreement as a rider to the 1980 agreement will be required. After project completion, VWD expects to receive approximately \$1,450,000 in project design and construction reimbursements.

**Operations Impact:** Improve maintenance access. Reduce risk of sewer spills. Annual and routine pipeline maintenance.

#### **Project Spending Plan**

Project Phase	Previous Spending	FY 22/23	FY 23/24	FY 24/25	FY 25/26	FY 26/27 & Thereafter	Total

# Capital Improvement Program 16-Inch Emergency Bypass Pipeline Rehabilitation

**Description:** Rehabilitate approximately 4,550 feet of existing 16-inch reinforced plastic mortar sewer pipeline and 3,500 feet of existing 12-inch ductile iron pipeline with a cured-in-place pipe (CIPP) liner and replace necessary isolation valves and appurtenances. Provide new permanent access locations at incremental lengths along both alignments.

Project Manager: Ryan Morgan Department: Engineering

**Project:** 2021100003 Funding Source: 100% Fund 210 – Sewer Replacement

Work Order: 232899

Comments: The 16-inch Emergency Bypass pipeline was installed in 1969 and connects to the District's 24-inch Land Outfall pipeline in the City of Carlsbad. The pipeline extends from Melrose Drive near Poinsettia Lane and follows a natural canyon easterly to Rancho Santa Fe Road near Via Cancion. The pipeline is primarily composed of reinforced plastic mortar (RPM) pipe, commonly referred to as "Techite", with some section of ductile iron pipe (DIP). The pipeline, controlled by a series of valves, serves as an emergency bypass of sewer flows to and from the Meadowlark Water Reclamation Facility (MRF) and the Land Outfall pipeline to the Encina Water Pollution Control Facility (EWPCF) in Carlsbad. Due to age, material, and corrosive environment, the pipeline has suffered breaks in recent years and several of the control valves are no longer functional.

This project will also incorporate necessary rehabilitation to the District's Failsafe 12-inch DIP Outfall located approximately 5-feet offset of the 16-inch Emergency Bypass pipeline. Both utilities are considered at-risk critical infrastructure assets to the District. Combining the work under this project will result in an overall savings in excess of \$500,000 when compared to executing the two pipeline rehabilitation projects under individual capital improvement projects.

**Operations Impact:** Restore operation to broken valves and increase longevity of the Emergency Bypass Sewer and the Failsafe Outfall pipelines.

**Project Spending Plan**

# **Capital Improvement Program Sage Canyon Tank Refurbishment**

**Description:** Sage Canyon Tank requires interior refurbishment.

Project Manager: Ryan Morgan Department: Engineering

**Project:** 2020100006 Funding Source: 100% Fund 110 – Water Replacement

Work Order: 240051

**Comments:** The existing interior lining of the 3.7 million gallon (MG) tank has deteriorated and requires full refurbishment. This project will remove the existing lining and coating and install a new lining and coating. Structural repairs to the ceiling rafters and equipment upgrades may also be necessary.

Operations Impact: Prevent further delamination of the existing lining. Routine maintenance

### **Project Spending Plan**

Project Phase	Previous Spending	FY 22/23	FY 23/24	FY 24/25	FY 25/26	FY 26/27 & Thereafter	Total

# Capital Improvement Program Richland Invert Replacement

**Description:** This project calls for the replacement of the existing 100-foot wastewater siphon pipeline that travels under San Marcos Creek from the Diamond Environmental Services parking lot south of Mission Road to the 18-inch Richland Interceptor. The existing 8-inch and 10-inch pipelines will be replaced with either a new 15-inch or 18-inch diameter siphon to be located at the existing pipelines' location.

Project Manager: Ryan Morgan Department: Engineering

Project: 2012100002 Funding Source: 55% Fund 220 – Sewer Capacity

Work Order: 123749 45% Fund 210 – Sewer Replacement

Comments: The existing 8-inch and 10-inch invert pipelines were installed over 27 years ago and were originally designed to be temporary. Because of their size restrictions, surcharging occurs in the upstream gravity pipelines during peak flows. In addition, recent inspections by the District's Collections crew have revealed damage to the existing pipe. This project will evaluate whether a new, larger capacity siphon underneath the San Marcos Creek or a gravity line in the City right-of-way is the most cost effective option. If the creek crossing is selected, staff anticipates environmental wetland permitting will be required. The 2018 Master Plan has identified this replacement as project SP-10.

**Operations Impact:** The project increases sewage handling capacity in the collections system and solves an existing sewer surcharge issue during daily peak and wet weather events. Annual, routine sewer pipeline maintenance is expected with the completion of this project.

**Project Spending Plan** 

Project Phase	Previous Spending	FY 22/23	FY 23/24	FY 24/25	FY 25/26	FY 26/27 & Thereafter	Total

# **Capital Improvement Program MRF - Biological Selector Improvements**

**Description:** Construct modifications to the existing aeration basins to reduce sludge bulking, improve treatment, and reduce operation and maintenance costs at the Meadowlark Water Reclamation Facility (MRF).

Project Manager: Ryan Morgan Department: Engineering

Project: 2019100002 Funding Source: 100% Fund 250 - Reclaimed

Work Order: 209696

**Comments:** Using biological modeling, this project will make improvements to the aeration basin operation and capacity. With the addition of a anaerobic selector to the existing aeration basin, overall treatment will improve, lowering operational costs. In addition flexibility will be added to the process by allowing treatment to occur without running the roughing filters. Infrastructure modifications will be made to the aeration basin including changing to ceramic disc diffusers and adding geo-membrane baffling, a new compressed air mixing system, and process control probes.

The construction of the biological selector will only proceed with an agreement from the current recycled water customers (City of Carlsbad and Olivenhain Municipal Water District) to reimburse the District through the Recycled Water Rates.

**Operations Impact:** Reduce operation and maintenance costs.

#### **Project Spending Plan**

Project Phase	Previous Spending	FY 22/23	FY 23/24	FY 24/25	FY 25/26	FY 26/27 & Thereafter	Total
Planning	\$50,000						\$50,000

# **Capital Improvement Program Coggan Pump Station Improvements**

**Description:** Install new permanent generator with automatic transfer switch. Upgrade motor starters and controls.

Project Manager: Dean Toth

Department: Mechanical/Electrical

**Project:** 2021100008 Funding Source: 100% Fund 110 – Water Replacement

**Comments:** Coggan Pump Station has no permanent generator for emergency power. To insure reliability to this facility, an Air Pollution Control District (APCD) / California Air Resources Board (CARB) compliant generator will need to be installed at the station. Improvements will also include an automatic transfer switch, enclosure, concrete pad, and conduit. This project will also replace and upgrade the stations motor starters and controls to current industry standards.

**Operations Impact:** Provide reliability to the pump station in the event of a power failure. Routine maintenance.

#### **Project Spending Plan**

Project Phase	Previous Spending	FY 22/23	FY 23/24	FY 24/25	FY 25/26	FY 26/27 & Thereafter	Total

# Capital Improvement Program District-wide SCADA Upgrade Project

**Description:** Upgrade SCADA Network, Software and Hardware Components.

Project Manager: Matias Labarrere Department: Operations and Maintenance

**Project:** 2020100004 Funding Source: 51% Fund 110 – Water Replacement

49% Fund 210 - Sewer Replacement

#### **Comments:**

The District's existing Supervisory Control and Data Acquisition (SCADA) system is outdated and obsolete. Replacement parts are difficult to obtain, extremely expensive and technical support is no longer available. The existing hardware is 1970's technology and no longer compatible with current software operating systems. The new hardware will include SCADA radios and PLC's (Programmable Logic Controllers) that are Ethernet capable, allowing for faster data transfer rates. This new hardware and software will also allow remote access, which allows staff to program and troubleshoot the SCADA network from one central location. This will decrease the downtime of the network and reduce travel time to remote sites, saving staff time and improving efficiency. Security of the SCADA network will be much improved with this upgrade and Operations will be working with IT staff to ensure the District's cyber-security needs are met.

**Operations Impact:** Routine maintenance.

#### **Project Spending Plan**

# Capital Improvement Program MRF - Tertiary Structural Rehab and Repairs

**Description:** The Tertiary Treatment Area at the Meadowlark Water Reclamation Facility (MRF) requires rehabilitation and repairs to the influent chamber, an associated air line, a joint seal and pipe opening to Filter Basin No. 3, the existing sluice gate located in the Chlorine Contact Tank - Effluent and Backwash Pump Station, and various related areas.

Project Manager: Ryan Morgan Department: Engineering

Project: 2018100011 Funding Source: 100% Fund 250 - Reclaimed

Work Order: 218021

**Comments:** The Meadowlark Water Reclamation Facility's (MRF) Tertiary Treatment Area needs various repairs due to the corrosive nature of the treatment process. The existing high solids epoxy coating the tertiary influent chamber is failing. A stainless steel mixing air line inside the chamber has also developed leaks. Using bypass methods, the chamber's protective lining will need to be repaired and the airline replaced. Associated with the tertiary influent chamber is a concrete mixer platform that has deteriorated and will need to be replaced with new steel beams and platform.

Downstream from the influent chamber are six tertiary filter basins. The joint seal in Filter Basin No. 3 is failing, resulting in corrosion to a pipe opening at the bottom of the filter and corrosion to the associated pipe located outside of the basin in the Filter Pipe Gallery. This isolated area will need to be repaired and recoated. All work will need to be scheduled during low production of recycled water.

To get more competitive pricing, and due to the coordinated scheduling of the related work, these individual repairs will be grouped together under one construction contract.

**Operations Impact:** Restore operational functionality. Maintains the integrity of tertiary treatment area and operational processes. Normal maintenance.

**Project Spending Plan** 

Project Phase	Previous Spending	FY 22/23	FY 23/24	FY 24/25	FY 25/26	FY 26/27 & Thereafter	Total
Planning	\$5,000						\$5,000
Design	\$108,000						\$108,000
Construction	\$105,000	\$889,000					\$994,000
Total	\$218,000	\$889,000	\$0	\$0	\$0	\$0	\$1,107,000

FY 2022/23 Budget Request - \$73,000

# **Capital Improvement Program Ductile Iron Pipe Condition Assessment**

**Description:** Leverage the District's Asset Management Program to perform condition assessment on targeted areas of the ductile iron pipe system that have been experiencing breaks in recent years. Results will be evaluated to minimize future replacement projects and reduce chances of emergency repairs.

Project Manager: Susan Bowman (Inactive)

Department: Engineering

**Project:** 2020100010 Funding Source: 100% Fund 110 – Water Replacement

Work Order: 241676

Comments: The District will plan and implement a phased, multi-year condition assessment program. This program will use pipeline condition assessment technology in conjunction with the District's Asset Management Program, to target specific areas in the ductile iron pipe (DIP) water line system for evaluation. The program will determine whether pipelines are in need of repair, rehabilitation, or full replacement. Coordination with Operations staff will minimize disruption to customers and provide invaluable insight to developing implementation plans. Implementation plans will establish where pipe tools will be inserted into the water line to measure pipeline wall thickness. Results will be evaluated to maximize the beneficial use of the District's existing infrastructure.

**Operations Impact:** Reduce risk of water line breakage by identifying potential repairs. Extend the useful life of the existing water lines, reduce operational costs of annual and routine pipeline maintenance.

### **Project Spending Plan**

Project Phase	Previous Spending	FY 22/23	FY 23/24	FY 24/25	FY 25/26	FY 26/27 & Thereafter	Total

## Capital Improvement Program Las Posas Water Line Replacement

**Description:** Replace an existing 10-inch water line crossing underneath an existing double reinforced box culvert on Las Posas Road.

Project Manager: Ryan Morgan Department: Engineering

**Project:** 2018100004 Funding Source: 100% Fund 110 – Water Replacement

Work Order: 241017

**Comments:** A 10-inch ductile iron (DIP) water main underneath a double reinforced box culvert (RBC) on Las Posas Road, between Linda Vista Drive and Stone Drive is aging and in need of replacement. It has experienced a break in recent years and control valves associated with this water main are non-operational. The replacement will involve installing a new parallel PVC water main in a steel casing and reconnecting to the existing asbestos-cement pipe (ACP) located on either side of the double RBC.

**Operations Impact:** Prevent future breaks. Routine maintenance.

### **Project Spending Plan**

Project Phase	Previous Spending	FY 22/23	FY 23/24	FY 24/25	FY 25/26	FY 26/27 & Thereafter	Total
Planning	\$7,000						\$7,000
Design	\$120,000	·					\$120,000
Construction		\$760,000					\$760,000
Total	\$127,000	\$760,000	\$0	\$0	\$0	\$0	\$887,000

FY 2022/23 Budget Request - \$384,000

Project Approval	Planning		Design		Construction		Completion
	Begin	End	Begin	End	Begin	End	
Jun 2017	Jun 2018	Apr 2021	May 2021	Jun 2022	Dec 2022	Jun 2023	Jun 2023

## **Capital Improvement Program Steel Pipeline Condition Assessment**

**Description:** Leverage the District's Asset Management Program to perform condition assessment on targeted areas of the District's highest priority steel water line. Results will be evaluated to minimize future replacement projects and reduce chances of emergency repairs.

Project Manager: Jason Hubbard Department: Engineering

**Project:** 2020100007 Funding Source: 100% Fund 110 – Water Replacement

Work Order: 213264

Comments: The District will plan and implement a phased, multi-year condition assessment program. This program will use pipeline condition assessment technology in conjunction with the District's Asset Management Program, to target specific areas in the District's steel (CML&C) water line system for evaluation. The program will determine whether pipelines are in need of repair, rehabilitation, or full replacement. Coordination with Operations staff will minimize disruption to customers and provide invaluable insight to developing work plans. Work plans will establish where pipe tools will be inserted into the water line to measure pipeline wall thickness. Results will be evaluated to maximize the beneficial use of the District's existing infrastructure.

**Operations Impact:** Reduce risk of water line breakage by identifying potential repairs. Extend the useful life of the existing water lines. Annual and routine pipeline maintenance.

### **Project Spending Plan**

Project Phase	Previous Spending	FY 22/23	FY 23/24	FY 24/25	FY 25/26	FY 26/27 & Thereafter	Total
Planning							
Design		\$25,000	\$75,000	\$75,000	\$50,000		\$225,000
Construction			\$280,000	\$175,000	\$175,000		\$630,000
Total	\$0	\$25,000	\$355,000	\$250,000	\$225,000	\$0	\$855,000

## Capital Improvement Program Sewer Lining and Rehab 2022

**Description:** The project consists of constructing approximately 9,900 feet of gravity sewer trenchless rehabilitation at locations throughout the District.

Project Manager: Ryan Morgan Department: Engineering

**Project:** 2022100003 Funding Source: 100% Fund 210 – Sewer Replacement

Work Order: 247465

Comments: Gravity sewer line segments throughout the District totaling approximately 9,900 feet are in need of rehabilitation to restore structural integrity and flow capacity. These pipe sections have become compromised due to a combination of O&M deficiencies (age, pipe material type, ground settlement, grease deposits, root intrusion) and Structural Defects (cracks, voids, collapse). Significant costs will be accrued upon line failures if the sections of sewer pipeline are not rehabilitated. The project will utilize trenchless cured-in-place pipe (CIPP) liners, to rehabilitate the existing pipelines. To take advantage of volume pricing discounts and to solicit more competitive bids, multiple sewer pipe segments are grouped together in one bid package, rather than broken into smaller projects.

**Operations Impact:** Restored structural integrity and flow capacity and increased service life of sewer line sections.

### **Project Spending Plan**

Project Phase	Previous Spending	FY 22/23	FY 23/24	FY 24/25	FY 25/26	FY 26/27 & Thereafter	Total
Planning	\$5,000						\$5,000
Design	\$40,000						\$40,000
Construction	\$240,000	\$520,000					\$760,000
Total	\$285,000	\$520,000	\$0	\$0	\$0	\$0	\$805,000

FY 2022/23 Budget Request - (\$65,000)

# Capital Improvement Program Asset Management Replacement Schedule

**Description:** Create a comprehensive Asset Management Plan integrating the District's own computerized maintenance management system (CMMS), prioritized Asset/Infrastructure replacement schedule, including condition assessment, for the District Facilities. This item is part of the VWD Strategic Plan – Strategic Focus Area 1.2.

Project Manager: Jason Hubbard Department: Engineering

**Project:** 2014100004 Funding Source: 50% Fund 110 – Water Replacement

Work Order: 189410 50% Fund 210 – Sewer Replacement

Comments: The District's infrastructure is aging and proper planning requires an understanding of when, where, and how much replacing that infrastructure will cost. Proper preventative maintenance helps ensure the District obtains the maximum beneficial life out of its infrastructure. The District has already taken steps towards this by implementing a computerized maintenance management system (CMMS) known as Maximo to implement and track preventative, corrective, and emergency maintenance/repairs on all assets/infrastructure. This project will take the CMMS, Geographical Information System (GIS) and condition information to develop an Asset Management Plan that will provide a prioritized, risk-based replacement schedule with cost estimates over the expected life of all assets/infrastructure. This, plus a Business Risk Exposure analysis and performance of condition assessments on infrastructure, will help the the Asset Management Plan identify future renewal and replacement projects.

**Operations Impact:** An Asset Management Plan with schedule will help to prevent costly line breaks, prioritize resource allocation, improve efficiency and reduce overall asset lifecycle costs.

#### **Project Spending Plan**

Project Phase	Previous Spending	FY 22/23	FY 23/24	FY 24/25	FY 25/26	FY 26/27 & Thereafter	Total
Planning	\$40,000	\$20,000	\$30,000				\$90,000
Design	\$90,000	\$100,000	\$35,000				\$225,000
Construction	\$170,000	\$125,000	\$94,000				\$389,000
Total	\$300,000	\$245,000	\$159,000	\$0	\$0	\$0	\$704,000

# **Capital Improvement Program Meadowlark Stabilization and Maintenance Improvements**

**Description:** Design and installation of new slope stabilization, access pathways, and landscaping at the Meadowlark Water Reclamation Facility

Project Manager: Matt Wiese Department: Meadowlark Reclamation Facility

**Project:** 2022100008 Funding Source: 100% Fund 210 – Sewer Replacement

Comments: The Meadowlark Water Reclamation Facility (MRF) needs improvements to address the high maintenance erosion on steeper slopes, lack of access to facilities in steep or vegetated areas, and deficiencies in the irrigation system. The project will address slope stabilization with a mix of landscape, erosion control, and structural features. Improvements will help maintain regulatory requirements for storm water runoff. Additionally access will be enhanced with new hardscape to complement slope stabilization and landscape improvements. Aesthetically inconsistent landscape themes will be corrected and repairs and upgrades to the irrigation system will be completed. The existing landscaping at MRF has not responded well to reclaimed water and will shift focus to drought tolerant plants, improving the aesthetics for public tours throughout the year and will reflect the District's message to the public of the importance of low water usage landscaping.

**Operations Impact:** Reduced maintenance and water usage.

### **Project Spending Plan**

Project Phase	Previous Spending	FY 22/23	FY 23/24	FY 24/25	FY 25/26	FY 26/27 & Thereafter	Total

# Capital Improvement Program MRF Direct Potable Reuse

**Description:** VWD would like to explore the feasibility of repurposing or expanding MRF Plant Capacity and providing potable reuse.

Project Manager: Elizabeth Lopez

Department: Engineering

**Project:** 2021100006 Funding Source: 100% Fund 210 – Sewer Replacement

**Comments:** The Meadowlark Water Reclamation Facility (MRF) currently provides approximately 4 MGD of recycled water to the Olivenhain Municipal Water District and the City of Carlsbad. VWD would like to explore the feasibility of repurposing some of this capacity, or expanding MRF, to create potable water for distribution to VWD's water customers. The evaluation is the first step in determining if this concept is technically and financially feasible.

**Operations Impact:** Potential to provide alternative water supply source

### **Project Spending Plan**

Project Phase	Previous Spending	FY 22/23	FY 23/24	FY 24/25	FY 25/26	FY 26/27 & Thereafter	Total

# Capital Improvement Program Coronado Hills Tank Exterior Refurbishment

**Description:** Coronado Hills Tank requires exterior refurbishment.

Project Manager: Ryan Morgan Department: Engineering

**Project:** 2021100005 Funding Source: 100% Fund 110 – Water Replacement

**Comments:** The existing exterior coating of the 2.6 million gallon (MG) tank has deteriorated and requires full refurbishment. As part of the refurbishment, some equipment upgrades may be necessary.

**Operations Impact:** Prevent further deterioration of the exterior coating and corrosion of the metal tank shell. Routine maintenance.

## **Project Spending Plan**

Project Phase	Previous Spending	FY 22/23	FY 23/24	FY 24/25	FY 25/26	FY 26/27 & Thereafter	Total

## Capital Improvement Program Rock Springs Valve Replacement

**Description:** Replace the existing 12-inch and 14-inch valve cluster at Rock Springs Road and Bennet Avenue and associated piping. The valves are non-operational and the nearby pipeline has failed in recent years.

Project Manager: Ryan Morgan Department: Engineering

**Project:** 2016100007 Funding Source: 100% Fund 110 – Water Replacement

**Comments:** The Rock Springs Rd and Bennett Avenue intersection has a cluster of three 10-inch, two 12-inch and one 14-inch gate valve that are not working properly and have caused the nearby pipelines to fail in the past. By replacing the non-functioning valves and affected pipeline this project will allow proper isolation and control of the water system and reduce the number of customers affected during future pipeline failures or shutdowns.

**Operations Impact:** Replacement of non-operational valves. Future operations and maintenance repair costs will be minimized at this location.

### **Project Spending Plan**

Project Phase	Previous Spending	FY 22/23	FY 23/24	FY 24/25	FY 25/26	FY 26/27 & Thereafter	Total

# **Capital Improvement Program Energy Management Systems**

**Description:** The Energy Management System is an on-going project approach to energy management for the District.

Project Manager: Ryan Morgan Department: Engineering

**Project:** 2022100006 Funding Source: 51% Fund 110 – Water Replacement

Work Order: 248402 49% Fund 210 - Sewer Replacement

**Comments:** The District entered into a power purchase agreement in November 2019 to develop new solar sites which will ultimately reduce future energy costs at the following two locations:

1. Net Energy Metering at Lift Station No. 1

2. RES-BCT Project at Twin Oaks Reservoirs 1 & 2 Site

Additional SGIP grant funding opportunities through Tesla for multiple battery sites throughout the District are in various stages of design and construction. The combination of District Wide Solar Power Purchase Agreement with the future energy storage capacity bandwidth at the District required a comprehensive Energy Management Study. The Energy Management Study outlined recommendations to further investigate and manage opportunities to reduce peak-use power consumption at various sites through the integration of available renewable resource assets.

**Operations Impact:** Determining optimal usage of District renewable energy assets to achieve long-term savings in District's monthly payments to electrical utility.

#### **Project Spending Plan**

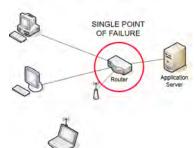

Project Phase	Previous Spending	FY 22/23	FY 23/24	FY 24/25	FY 25/26	FY 26/27 & Thereafter	Total
Planning	\$10,000						\$10,000
Design	\$125,000	\$50,000	\$40,000	\$40,000	\$40,000		\$295,000
Construction		\$25,000	\$10,000	\$10,000	\$10,000		\$55,000
Total	\$135,000	\$75,000	\$50,000	\$50,000	\$50,000	\$0	\$360,000

#### FY 2022/23 Budget Request - \$130,000

Project Approval	Planning		Design		Construction		Completion

# Capital Improvement Program Redundancy for Admin. Wireless Radio Network

**Description:** The District provides network connectivity between facilities via wireless radio infrastructure. Additional redundancy of radio network is necessary in order to provide continuity of data communications between sites in the event of a radio failure.

Project Manager: Matias Labarrere Department: Information Technology

**Comments:** Upgrades to District Wireless Radio network. Additional radio stations are needed to support redundancy of data communications between the following district locations: Admin/Operations Buildings, Meadowlark Reclamation Facility, Twin Oaks Reservoir. Current Administrative Wireless radio architecture has a single point of failure - one fault or malfunction will cause the entire communications system to stop operating in the event of a single radio outage.

**Operations Impact:** Additional redundancy must be added to the Administrative radio network in order to provide continuity of data communications in the event of radio failures.

#### **Project Spending Plan**

Project Phase	Previous Spending	FY 22/23	FY 23/24	FY 24/25	FY 25/26	FY 26/27 & Thereafter	Total
Planning	\$48,000	\$16,000					\$64,000
Design		\$58,000					\$58,000
Construction		\$225,000					\$225,000
Total	\$48,000	\$299,000	\$0	\$0	\$0	\$0	\$347,000

FY 2022/23 Budget Request - \$0

Project Approval	Planning		Design		Construction		Completion
	Begin	End	Begin	End	Begin	End	
Jul 2019							Jun 2023

# Capital Improvement Program Lake San Marcos Lift Station Improvements

**Description:** Determine if existing generator is sufficient for station requirements and replace if needed.

Project Manager: Dean Toth

Department: Mechanical/Electrical

**Project:** 2022100005 Funding Source: 100% Fund 210 – Sewer Replacement

**Comments:** The existing generator may not be large enough to power the entire facility with all pumps running. Having sufficient available backup power during a major storm event is critical as this is usually when SDG&E power is unstable or becomes unavailable.

A hydraulic study will be performed to determine if the pumps in the station can be modified to meet required flows or if the generator needs to be replaced.

**Operations Impact:** Improved pumping capacity and reliability. Routine maintenance.

### **Project Spending Plan**

Project Phase	Previous Spending	FY 22/23	FY 23/24	FY 24/25	FY 25/26	FY 26/27 & Thereafter	Total
Planning							
Design	\$50,000	·					\$50,000
Construction		\$250,000					\$250,000
Total	\$50,000	\$250,000	\$0	\$0	\$0	\$0	\$300,000

FY 2022/23 Budget Request - \$65,000

Project Approval	Planning		Design		Construction		Completion
	Begin	End	Begin	End	Begin	End	
Jul 2021	Mar 2022	Apr 2022	May 2022	Jan 2023	Jan 2023	Jun 2023	Jun 2023

# Capital Improvement Program Rancheros Drive Easement Sewer Replacement and Rehabilitation

**Description:** Rehabilitate approximately 350-feet of corroded sewer pipe with a cured-in-place liner, replace approximately 70-feet with PVC pipe, and construct a new manhole to allow for servicing of the line.

Project Manager: Ryan Morgan Department: Engineering

**Project:** 2021100007 Funding Source: 100% Fund 210 – Sewer Replacement

Work Order: 248644

**Comments:** The Rancheros Drive Easement Sewer Replacement and Rehabilitation includes approximately 350-feet of deteriorated ductile iron and clay pipeline in need of rehabilitation and approximately 70-feet of pipeline that requires replacement due to miscellaneous structural and operational defects. This pipeline was originally installed in 1972 and with the current corrosion and operational defects, District staff is no longer able to safely clean and maintain the sewer line.

**Operations Impact:** Improve maintenance. Prevent sewer spills.

### **Project Spending Plan**

Project Phase	Previous Spending	FY 22/23	FY 23/24	FY 24/25	FY 25/26	FY 25/26 & Thereafter	Total
Planning	\$15,000						\$15,000
Design		\$15,000					\$15,000
Construction			\$270,000				\$270,000
Total	\$15,000	\$15,000	\$270,000	\$0	\$0	\$0	\$300,000

FY 2022/23 Budget Request - \$0

Project Approval	Planning		Design		Construction		Completion
	Begin	End	Begin	End	Begin	End

# Capital Improvement Program Palos Vista Pump Station - Motor Starters Upgrade

**Description:** Upgrade four auto-transformer motor starters to solid state soft starters.

Project Manager: Dean Toth

Department: Mechanical/Electrical

**Project:** 2020100011 Funding Source: 100% Fund 110 – Water Replacement

#### **Comments:**

Replace four auto-transformer motor starters. Replacement is required due to wear from a long service life of over 25 years and a lack of support for replacement parts. New solid state soft starters will improve reliability and operating efficiency of electric motors.

**Operations Impact:** Routine maintenance.

## **Project Spending Plan**

Project Phase	Previous Spending	FY 22/23	FY 23/24	FY 24/25	FY 25/26	FY 26/27 & Thereafter	Total
Planning	\$5,000						\$5,000
Design	\$25,000		·				\$25,000

Jul 2019					Apr 2022	Oct 2022	Nov 2022

# Capital Improvement Program Maximo Mobility

**Description:** Develop a mobile enhancement to the CMMS Maximo Asset Management system.

Project Manager: Matias Labarrere Department: Information Technology

**Project:** 2022100004 **Funding Source:** 51% Fund 110 – Water Replacement 49% Fund 210 - Sewer Replacement

Comments: The District has implemented a computerized maintenance management system (CMMS) in IBM Maximo to track asset specifications, installation information, purchasing details and the work performed to maintain those assets. The standard Maximo system is designed to be used on a desktop computer in the office. The District desires to use the Maximo system in the field by staff to record maintenance activities as it occurs. An enhancement to the Maximo software will create a user interface suitable for use by field staff using tablet computers or smart phones. Many solutions exist to mobilize the Maximo system, building on top of the core system, which provide for simple-to-use data entry forms, allow for non-connected field use and also present the assets and work orders on a map, facilitating location identification for field use. This enhancement will bring about labor time savings, more accurate and timely data capture, and improve information access for staff as they are working in the field. This project will develop the requirements, business processes, key performance metrics, system design, implementation and user training.

**Operations Impact:** Enhance the usage of the CMMS by field crews, optimizing labor time, improving data capture, and providing information to field crews.

#### **Project Spending Plan**

Project Phase	Previous Spending	FY 22/23	FY 23/24	FY 24/25	FY 25/26	FY 26/27 & Thereafter	Total
Planning		\$70,000					\$70,000
Design		\$100,000	-				\$100,000

# Capital Improvement Program City of San Marcos Joint Projects Relocate/Adjust

**Description:** This amount is set-aside to cover services rendered in conjunction with various City of San Marcos projects involving District infrastructure per the District/City of San Marcos Cost Sharing Agreement dated March 31, 2009. This includes District staff time involved in inspection and project management, as well as reimbursements to the City for District infrastructure relocations and adjustments.

Project Manager: Elizabeth Lopez

Department: Engineering

Project: 2021100013 Funding Source: See Below

Work Order: 207141, 250092

**Comments:** 

Miscellaneous relocations/adjustments resulting from City of San Marcos joint projects. These projects are in conjunction with the City's Capital Improvement Plan. Currently two projects are proposed:

Project: Amount: Source:

San Marcos Blvd. & Discovery St.\* \$202,000 100% Fund 110 - Water Replacement
Rancho Coronado Park Improvements\*\* \$63,000 100% Fund 110 - Water Replacement
Total \$265,000

\* Totals do not include potential construction change orders.

**Operations Impact:** Normal maintenance for infrastructure.

### **Project Spending Plan**

Project Phase	Previous Spending	FY 22/23	FY 23/24	FY 24/25	FY 25/26	FY 26/27 & Thereafter	Total
Planning							
Design	\$34,000		·				\$34,000
Construction	\$17,000	\$214,000	•				\$231,000
Total	\$51,000	\$214,000	\$0	\$0	\$0	\$0	\$265,000

FY 2022/23 Budget Request - \$184,000

Project Approval	Planning		Design		Construction		Completion
	Begin	End	Begin	End	Begin	End	
Jul 2020							Jun 2023

<sup>\*\*</sup> Per the Cost Sharing Agreement, construction of District facilities will be paid for by the City.

### Capital Improvement Program Via Vera Cruz Tank Hill Stabilization

**Description:** A side slope adjacent to the Via Vera Cruz Tank requires slope stabilization treatment.

Project Manager: Ryan Morgan Department: Engineering

**Project:** 2016100014 Funding Source: 100% Fund 110 – Water Replacement

Work Order: 162901

**Comments:** A portion of the existing slope adjacent to the Via Vera Cruz Tank on District property is failing due to steep terrain and material composition. The foundation of a property line fence is being eroded and exposed and material washes down to the tank elevation. Routine clean-up of the area is done and falling rocks threaten to damage the tank. Phase 1 of the project installed a rigid barrier at the toe of slope along a portion of the perimeter to catch failing rocks. Phase 2 will apply a mesh or tensioned slope stabilization system to approximately 2200 square feet (SF) of steep slope to prevent further failures. Repairs to the property line fence will also be performed and landscaping repairs may be necessary.

**Operations Impact:** Reduced risk of damage to the tank from falling rocks. Eliminate clean-up of the area from debris. Maintain security of property with intact fence. Annual and routine monitoring of the slope.

### **Project Spending Plan**

Project Phase	Previous Spending	FY 22/23	FY 23/24	FY 24/25	FY 25/26	FY 26/27 & Thereafter	Total
Planning							
Design	\$7,000		\$20,000				\$27,000
Construction	\$28,000			\$195,000			\$223,000

# Capital Improvement Program DHS- Upgrades for Critical Infrastructure Hardware

**Description:** The Department of Homeland Security (DHS) performed an audit of the District Industrial Control System (ICS) Information Technology Network on 11/27-28/2018. Audit As a result of the audit, several recommendations were provided to enhance system architecture on the Supervisory Control and Data Acquisition (SCADA) network. Initiatives contained within this CIP aim to strengthen the cybersecurity posture of the District's industrial control systems (ICS).

Project Manager: Matias Labarrere Department: Information Technology

Project: 2020100012 Funding Source: 51% Fund 110 – Water Replacement

49% Fund 210 - Sewer Replacement

Comments: As a core part of its mission to reduce risk to the Nation's critical infrastructure (CI), Department of Homeland Security (DHS) National Cyber Assessments and Technical Services (NCATS) subject matter experts provide cybersecurity assessments to CI asset owners and operators to strengthen the cybersecurity posture of their industrial control systems (ICS). NCATS on behalf of the National Cybersecurity and Communications Integration Center (NCCIC) provides voluntary assessments based on standards, guidelines, and best practices. The assessment methodology provides a structured framework that asset owners and operators can leverage to evaluate and validate the cybersecurity of their ICS networks. The information gained from these reviews provided the District with additional understanding and context necessary to build effective defense-in-depth processes for enhancing our cybersecurity posture. The DHS team worked directly with the information technology (IT), operations technology (OT), and management staff at the VWD facilities to determine the overall cybersecurity posture of its ICS. DHS recommends physical isolation of the control systems network from the business network.

**Operations Impact:** Hardware upgrades contained within this CIP aim to strengthen the cybersecurity posture of the District's industrial control systems (ICS) per DHS recommendations.

**Project Spending Plan** 

Project Phase	Previous Spending	FY 22/23	FY 23/24	FY 24/25	FY 25/26	FY 26/27 & Thereafter	Total
Planning		\$44,000					\$44,000

# Capital Improvement Program Wulff Pressure Regulating Valve

**Description:** This project will install a new 4-inch diameter pressure regulating valve to allow the water level in the 350,000 gallon Wulff Tank to be regulated from the High Point hydro-pneumatic pump station to provide redundancy to the existing Wulff pressure zone.

Project Manager: Ryan Morgan Department: Engineering

**Project:** 2022100010 Funding Source: 100% Fund 120 – Water Capacity

Work Order: 244896

**Comments:** After the High Point residential development is completed to the south, an offsite waterline and pressure regulating valve will be built to provide an additional source of water from the High Point/Palos Vista area. This provides additional redundancy to the VWD water system in this area.

**Operations Impact:** The new pressure regulating valve will regulate the water elevation in the Wulff Tank when in operation which provides a redundant water supply to the Wulff pressure zone.

### **Project Spending Plan**

Project Phase	Previous Spending	FY 22/23	FY 23/24	FY 24/25	FY 25/26	FY 26/27 & Thereafter	Total
Planning	\$30,000						\$30,000
Design	\$10,000	\$40,000					\$50,000
Construction		\$120,000	\$30,000				\$150,000
Total	\$40,000	\$160,000	\$30,000	\$0	\$0	\$0	\$230,000

# Capital Improvement Program Door Access Control System Expansion -MRF & Mahr

**Description:** Access control for a total of thirty-nine (39) doors between Meadowlark Reclamation, Mahr, and Administrative facilities.

Project Manager: Matias Labarrere Department: Information Technology

**Comments:** There is a need to convert keyed locks at Meadowlark Reclamation, Mahr, and Administrative buildings to keyless entry and add them to our existing BlueWave access control system. This upgrade will allow dual access to doors through the use of a fob or a security code and will eliminate the need for keys at Meadowlark, Mahr, and Administrative buildings. This initiative will allow for improved control over access to VWD facilities while minimizing reliance on the management of physical keys.

Upgrades contained within this CIP are broken down in the following manner:

Access Control upgrades for Administrative Building - \$50,000

Access Control upgrades for Meadowlark and Mahr Facilities - \$140,000

Re-Key of existing locks for Administrative Building - \$5,000

Re-Key of existing locks for Meadowlark and Mahr Facilities-\$5,000

Operations Impact: Increased security, time savings, and eliminate the cost of replacing keys

#### **Project Spending Plan**

# **Capital Improvement Program Reclaimed Pumps - Evaluation and Design**

**Description:** Evaluate and construct piping for the backwash pumps to operate during low reclaimed flow periods.

Project Manager: Matt Wiese Department: Meadowlark Reclamation Facility

Project: 2022100007 Funding Source: 100% Fund 250 - Reclaimed

Comments: The large reclaimed pumps are used to pump tertiary treated water into the distribution system and Mahr Reservoir. During low demand periods, the reclaimed pumps cycle on and off throughout the day. This requires significant electrical power as well as adding wear to the pumping system. Next to the reclaimed pumps are two smaller backwash pumps that are used to pump reclaimed water for backwashing of the tertiary filters. If the pump curves of these two smaller pumps indicate they can be used to pump during low flow periods, then they could be tied into the header piping of the larger reclaimed pumps and be programmed to operate during low flow periods. This would reduce power consumption and maintenance costs.

**Operations Impact:** There will be some interruption to reclaimed effluent pumping during construction.

### **Project Spending Plan**

Project Phase	Previous Spending	FY 22/23	FY 23/24	FY 24/25	FY 25/26	FY 26/27 & Thereafter	Total

# Capital Improvement Program Upgrades to Surveillance Video Management System

**Description:** Upgrades to existing Video Recording systems are required to obtain additional coverage, fidelity, and performance of the District's centralized recording system.

Project Manager: Matias Labarrere Department: Information Technology

**Comments:** Upgrades to the District's video recording systems have been recommended by the Department of Homeland Security (DHS). Long-range IR illuminators and additional cameras are recommended to provide additional coverage for dimly lit facilities. Current limitations of installed hardware adversely affect the quality of video recording during the night.

**Operations Impact:** Increased security, resiliency, and performance of existing video recording system.

### **Project Spending Plan**

Project Phase	Previous Spending	FY 22/23	FY 23/24	FY 24/25	FY 25/26	FY 26/27 & Thereafter	Total

# Capital Improvement Program Maximo - GIS interface

**Description:** Develop an interface to replicate data between the CMMS and GIS to ensure accurate and consistent asset information.

Project Manager: Matias Labarrere Department: Information Technology

Project: 2022100011 Funding Source: 51% Fund 110 – Water Replacement

49% Fund 210 - Sewer Replacement

Comments: The District has implemented a computerized maintenance management system (CMMS) in IBM Maximo to track asset specifications, installation information, purchasing details and the work performed to maintain those assets. The District also maintains asset information in the geographic information system (GIS) which primarily documents asset location and connectivity in the water and sewer systems with cartography and maps, using the ESRI GIS software. It also tracks asset specifications, maintenance information and installation dates. These two systems have unique, non-redundant purposes but share asset information and work together to form a complete, complementary Asset Management system. Currently, the common information is not synchronized so updates to one system do not occur in the other. Staff strive to maintain the information manually but this is not efficient. To keep the information on our assets accurate and consistent, these two systems must be interfaced so that replication of data is occurring. This project will develop the data rules, interface design and technology to interface these two asset systems.

**Operations Impact:** Integration between these two systems will improve asset tracking and reduce inaccurate data.

#### **Project Spending Plan**

Project Phase	Previous Spending	FY 22/23	FY 23/24	FY 24/25	FY 25/26	FY 26/27 & Thereafter	Total

# **Capital Improvement Program Update Restrooms to ADA Compliance**

**Description:** Remove and replace the existing counters, sinks, mirrors, and paint. Fire system lights will need to be installed in the restrooms for compliance.

Project Manager: Steve Klein Department: Maintenance Services

**Project:** 2020100021 Funding Source: 51% Fund 110 – Water Replacement

49% Fund 210 - Sewer Replacement

**Comments:** Several restrooms in the Administration building need new counters, sinks, mirrors, and paint. When quotes were solicited for these updates, we were informed certain locations were not ADA compliant. Two areas of concern are the Lobby and Engineering restrooms.

**Operations Impact:** Some restrooms will be unavailable while under construction.

## **Project Spending Plan**

# **Capital Improvement Program Meadowlark - Concrete and Asphalt Improvements**

**Description:** Concrete and asphalt improvements needed at the Meadowlark Water Reclamation Facility.

Project Manager: Matt Wiese Department: Meadowlark Reclamation Facility

**Project:** 2022100017 Funding Source: 100% Fund 210 – Sewer Replacement

Comments: There are various concrete and asphalt modifications and repairs that need to be made at the Meadowlark Water Reclamation Facility. Some of the modifications needed are: 1) The front entrance to the Meadowlark Control Building is not ADA compliant. The wheelchair accessible ramp does not have wheelchair access leading up to the ramp and there is not enough space for a wheelchair to turn around. 2) A berm is needed at the top of the plant to keep rainwater from outside the District property from entering the plant storm water sampling location. Storm water currently enters the plant from the surrounding community, carrying debris that has a direct impact on the plant's storm water sampling analysis. 3) A ramp is needed to allow access for the forklift to reach the secondary deck. The forklift access will allow Meadowlark staff to lift equipment and supplies to the secondary deck, reducing the potential for injury. 4) Various points around the plant need general concrete repair. 5) The rock area that used to be the site of the rotating biological contactors needs to be paved. This will allow maintenance vehicles to access the aeration deck, secondary deck and odor scrubber. It will also increase the staging area for future projects.

**Operations Impact:** Minimal impact to plant operations during construction.

**Project Spending Plan**

# **Capital Improvement Program Sodium Bisulfite Secondary Containment**

**Description:** Install a secondary containment system for the sodium bisulfite chemical tank, pumps and piping system.

Project Manager: Matt Wiese Department: Meadowlark Reclamation Facility

Project: 2022100028 Funding Source: 100% Fund 250 - Reclaimed

Comments: The sodium bisulfite chemical tank, pumps and piping system require a secondary containment system. Sodium bisulfite is used for reclaimed water dechlorination after it has gone through the disinfection process. Without the secondary containment, a release of the chemical would flow along the curb and into the storm water wet well. The chemical would then be pumped into the waste backwash tank and recirculated through the plant process. A dedicated chemical containment system will capture any release before it could reach the road or storm water wet well. The system will allow for sensors to be placed inside the chemical containment barrier that will alert operators to a release.

**Operations Impact:** The sodium bisulfite secondary containment system will reduce safety hazards and contamination concerns associated with a potential release.

# **Capital Improvement Program OpenGOV Digital Transparency and Reporting**

**Description:** Implementation of an open data and financial transparency solution will provide the public with access to District financial data via an online portal.

Project Manager: Matias Labarrere Department: Information Technology

**Project:** 2022100031 Funding Source: 51% Fund 110 – Water Replacement

49% Fund 210 - Sewer Replacement

**Comments:** \*\*Subscription\*\*In an effort to provide additional transparency, the Finance Department would like to make Financial data sets available for public review/consumption. The OpenGOV platform will allow the District to publish financial data via online dashboards which can be shared with the public.

**Operations Impact:** Provision of financial data sets for public consumption will provide additional transparency of District Financial data.

### **Project Spending Plan**

# Capital Improvement Program Encina Wastewater Authority Five Year Plan

**Description:** The District is a member agency of the Encina Wastewater Authority (EWA). The District shares in the cost of planned asset replacements and capital acquisitions.

Project Manager: Wes Owen Department: Finance

**Project:** 2023100001 Funding Source: 100% Fund 210 – Sewer Replacement

Comments: These miscellaneous capital projects are budgeted each year

Operations Impact: No significant increase in costs or changes in efficiencies are anticipated from this project..

## **Project Spending Plan**

# Capital Improvement Program Storage Building & Shop

**Description:** Approximate 40' x 40' storage/shop building for four departments in Operations and Maintenance.

Project Manager: Steve Klein Department: Maintenance Services

Project: 2023100002 Funding Source: 51% Fund 110 – Water Replacement

49% Fund 210 - Sewer Replacement

Comments: The Operations and Maintenance department is in need of additional storage and shop space for four departments. Currently, two shipping containers are being used for storage by the landscape and construction department. This building will be used by the following departments: Meters, Landscape, Electrical/Instrumentation and Construction. The Meter Services department will have a bay to store tools, parts, and meter reading vehicle. The Landscape department will store gator/sprayers, tools, power equipment, and fuel. The Electrical/Instrumentation Technicians are expanding their breaker maintenance program and will use building to store materials and use as a shop. The Construction Department will use a bay to store equipment that should not be outside in the yard.

**Operations Impact:** Improved storage and shop areas. Routine maintenance.

### **Project Spending Plan**

Project Phase	Previous Spending	FY 22/23	FY 23/24	FY 24/25	FY 25/26	FY 26/27 & Thereafter	Total

# **Capital Improvement Program HVAC System for District Headquarters**

**Description:** Replacement of the HVAC system for the District's Administration and Operations buildings.

Project Manager: Steve Klein Department: Maintenance Services

**Project:** 2023100003 Funding Source: 51% Fund 110 – Water Replacement

49% Fund 210 - Sewer Replacement

Comments: The District's HVAC system is over 25 years old and has required several expensive repairs in the last few years. The system is inefficient and past its service life. The HVAC system serves the District's Administration and Operations buildings and will be completely replaced. The replacement will include the hardware, controls and communications software. The existing system does not allow staff to access the controls and troubleshoot any problems. This also prevents staff from making any adjustments to the system. Updating the system will allow staff better temperature control and improve overall energy efficiency.

**Operations Impact:** Improved energy efficiency and reliability.

### **Project Spending Plan**

Project Phase	Previous Spending	FY 22/23	FY 23/24	FY 24/25	FY 25/26	FY 26/27 & Thereafter	Total

# **Capital Improvement Program Pipeline Corrosion Protection Improvements**

**Description:** Pipeline corrosion protection systems throughout the District require remediate work to repair and replacement infrastructure necessary for the continued protection of steel and ductile iron pipes.

Project Manager: Jason Hubbard Department: Engineering

**Project:** 2023100004 Funding Source: 2% Fund 210 - Sewer Replacement

98% Fund 110 Water Replacement

**Comments:** The District's corrosion protection system protects steel and ductile iron pipe. Over time repairs and replacements are needed to anode beds, test stations, and appurtenances to continue to protective function of these systems. This project implements the recommendations of the 2020 pipeline corrosion protection assessment report for remediate work on these systems. This project will also conduct another corrosion protection assessment in 2024 and subsequent remediate work.

**Operations Impact:** Continued corrosion protection on steel and ductile iron pipes.

### **Project Spending Plan**

Project Phase	Previous Spending	FY 22/23	FY 23/24	FY 24/25	FY 25/26	FY 26/27 & Thereafter	Total
Planning		\$18,000		\$22,000			\$40,000
Design		\$40,000		\$55,000			\$95,000
Construction			\$483,000	\$220,000	\$212,000		\$915,000
Total	\$0	\$58,000	\$483,000	\$297,000	\$212,000	\$0	\$1,050,000

# Capital Improvement Program Land Outfall West Repair and Rehabilition

**Description:** The western segment of the sewer Land Outfall is in need of cleaning, rehabilitation, and repairs based on a condition assessment performed in 2021.

Project Manager: Ryan Morgan Department: Engineering

**Project:** 2023100005 Funding Source: 100% Fund 210 – Sewer Replacement

**Comments:** The existing sewer Land Outfall pipeline was installed in 1986 and connects the District's Lift Station No.1 to the Encina Water Pollution Control Facility (EWPCF). The 34,000 foot long pipeline has both gravity and pressurized segments. In 2021 the District performed a thorough condition assessment with recommended actions for cleaning and rehabilitation/repairs. This project will evaluate these prior recommendations in the context of future up-sizing needs and clean, rehabilitate, and repair necessary sections of approximately 17,700 feet of sewer pipeline ranging in size from 21-inch to 54-inch.

As joint partners in the Land Outfall, this project will require coordination with the City of Carlsbad and the Buena Sanitation District (Vista). This project is expected to receive reimbursements.

**Operations Impact:** Reduce the risk of sewer spills. Routine maintenance.

### **Project Spending Plan**

Project Phase	Previous Spending	FY 22/23	FY 23/24	FY 24/25	FY 25/26	Thereafter	Total
Planning		\$50,000					\$50,000
Design			\$250,000				\$250,000
Construction		,		\$500,000			\$500,000

# Capital Improvement Program MRF Headworks Assessment

**Description:** Condition assessment and implementation of recommended improvements to provide increased operational efficiency and reliability at the Meadowlark Water Reclamation Facility (MRF).

Project Manager: Ryan Morgan Department: Engineering

**Project:** 2023100006 Funding Source: 100% Fund 210 – Sewer Replacement

**Comments:** The Meadowlark Water Reclamation Facility (MRF) originally constructed on 1958, was upgraded in 1962, 1971, and 1982, with the most comprehensive upgrade in 2005. Equipment and process improvements are on-going due to age, regulatory changes, and environmental conditions. The District desires to perform a comprehensive condition assessment of the plant, built on prior technical documents, to evaluate operational defects and outline a data driven strategic schedule of replacements, upgrades, and improvements to produce quality service.

Due to immediate needs, staff will focus on flow conditions and inefficiencies in the headworks pretreatment process to optimize flow distribution, screening, grit removal and deragging systems. This project will provide design improvement recommendations for current and future wastewater flow conditions at MRF to provide increased operational efficiency and reliability.

Subsequent condition assessment and recommendations will expand to the entire plant.

**Operations Impact:** Improved operational efficiency. Long-term financial planning. Normal maintenance.

**Project Spending Plan** 

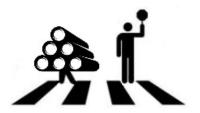

Project Phase	Previous Spending	FY 22/23	FY 23/24	FY 24/25	FY 25/26	FY 26/27 & Thereafter	Total

# Capital Improvement Program San Marcos Blvd at Pacific Street Sewer Relocation

**Description:** This project will relocate approximately 800 feet of existing 8-inch vitrified clay pipe (VCP) sewer main with new 8-inch polyvinyl chloride (PVC) sewer.

Project Manager: Elizabeth Lopez

Department: Engineering

**Project:** 2023100007 Funding Source: 100% Fund 210 – Sewer Replacement

Comments: The alignment of an existing 8-inch vitrified clay pipe (VCP) sewer main located south of San Marcos Boulevard at South Pacific Street crosses a large drainage channel. The existing sewer pipe has limited cover through the drainage channel and is in conflict with the City of San Marcos' Creek District Phase 1 storm drain improvements. The sewer will be relocated outside of the drainage channel, approximately 150 feet east of the existing location. This will eliminate the conflict with the City's storm drain improvements and improve access for maintenance of the sewer main. The City will reimburse the District 50% of the relocation construction costs.

**Operations Impact:** Normal maintenance for infrastructure and improved access.

### **Project Spending Plan**

Project Phase	Previous Spending	FY 22/23	FY 23/24	FY 24/25	FY 25/26	FY 26/27	Total

# Capital Improvement Program 5 Year PC / Laptop Refresh Plan

**Description:** Replacement or upgrades of District Information Technology Assets. Includes PC Desktops, laptops and corresponding peripherals.

Project Manager: Matias Labarrere Department: Information Technology

**Project:** 2023100009 Funding Source: 51% Fund 110 – Water Replacement

49% Fund 210 - Sewer Replacement

**Comments:** Secure and reliable technical infrastructure is mission critical to District operations and service to the public. Serious disruptions or costly unplanned emergency repairs can occur if end-of-life/end-of-support systems are not upgraded or replaced in a timely manner, resulting in reduced productivity and service levels. District PC's are refreshed over the course of a 5-year lifecycle, while Laptops are replaced every 3 years.

**Operations Impact:** Replacement of end-of-life equipment is necessary to ensure continuity of business operations.

### **Project Spending Plan**

# Capital Improvement Program MRF Battery Energy Storage System Retaining Wall

**Description:** Concrete retaining wall to accommodate the proposed Battery Energy Storage System (BESS) at Meadowlark Reclamation Facility (MRF).

Project Manager: Ryan Morgan Department: Engineering

Project: 2023100010 Funding Source: 50% Fund 210 - Sewer Replacement

Work Order: 258315

50% Fund 250 - Reclaimed

**Comments:** Meadowlark Water Reclamation Facility (MRF) was approved for a Battery Energy Storage (BESS) System through the State of California resiliency grant funding. To accommodate the footprint required for the proposed BESS at MRF, a concrete retaining wall will be designed and installed in an existing embankment adjacent to the existing electrical building. This improvement is needed before the battery system can be procured and installed.

**Operations Impact:** Provide necessary working clearances around the proposed BESS and adjacent south access roadway at MRF.

### **Project Spending Plan**

Project Phase	Previous Spending	FY 22/23	FY 23/24	FY 24/25	FY 25/26	FY 26/27 & Thereafter	Total

# **Capital Improvement Program Fire Services - Backflow Preventer Upgrades**

**Description:** Replace single-check backflow prevention systems with double-check systems on fire services.

Project Manager: Kevin Anctil

Department: Construction

**Project:** 2023100011 Funding Source: 100% Fund 110 – Water Replacement

**Comments:** The District is responsible for several fire service backflow preventers in the distribution system that were installed prior to new District standards being adopted. The single-check backflow preventers that were installed are no longer an acceptable device and some have failed due to corrosion from being installed in an underground vault. The Construction department will replace a few systems each year with an approved double-check backflow prevention system and bring the services above ground.

**Operations Impact:** Enhanced backflow prevention. Routine maintenance.

### **Project Spending Plan**

# **Capital Improvement Program Managed Operating System Patching Services**

**Description:** IT proposes the use of third-party managed operating system patching services to ensure timely installation of critical patches for the District's computing infrastructure.

Project Manager: Matias Labarrere Department: Information Technology

49% Fund 210 - Sewer Replacement

Comments: \*\*Subscription\*\*The Vallecitos Water District's Information Technology (IT) Division has directly managed computer system patching since PCs were introduced in the District in the late 1990s. At that time, patching had more to do with software enhancements or fixes and to correct system stability issues. Over the course of the past 10-15 years, maintaining 100% patch levels for all devices became critical for cybersecurity reasons. Patches released by software manufacturers to fix security flaws also inadvertently alerted malicious actors ("hackers") about those flaws. Hackers then write malicious code (viruses, worms, bots, rootkits, and Trojan horses, among others) or use other methods to take advantage of entities who have not applied the patches meant to repair the security flaws. Staff suggests enlisting the services of a dedicated patching provider. Such a provider would use purpose-built tools for automated scanning, testing, and deployment of patches. The District has an existing contract with Ostari, a consulting firm that provides IT support in the areas of infrastructure monitoring, help desk and network support. The firm has been providing IT support services to the District since 2011 and is in the best position to provide patching services due to existing knowledge of the District's network infrastructure.

**Operations Impact:** Timely installation of critical security patches will ensure continued confidentiality, integrity, and availability of District computing resources.

# Capital Improvement Program Repairs & Painting of Meadowlark Lift Station

**Description:** Make repairs to the damaged areas of the lift station. Paint interior and some exterior surfaces of the building and resurface the upper level floor.

Project Manager: Dean Toth

Department: Mechanical/Electrical

Project: 2023100013 Funding Source: 100% Fund 250 - Reclaimed

**Comments:** Meadowlark Lift Station needs to be painted and the upper level floor needs to be resurfaced after repairs to the station have been made.

The interior and portions of station's exterior needs to be repainted. Many years ago, the upper level floor was painted with "floor paint". This floor paint is worn and pealing. The paint will need to be mechanically removed prior to a new coating being applied. Some damaged areas of the concrete will need to be resurfaced or replaced. The paint on the metal ceiling/roof structure, piping and structural members show signs of wear and will need to be repainted for corrosion protection. Some of the metal beams and other steel sections of the structure will need to be repaired or replaced due to corrosion from the harsh environment.

Meadowlark Lift Station is one of our oldest facilities and requires these repairs and maintenance in order to protect it and the critical equipment it houses.

**Operations Impact:** Extend the life of the asset.

**Project Spending Plan**

# Capital Improvement Program AMI Pilot

**Description:** Pilot project to introduce the many benefits of an Advanced Metering Infrastructure.

Project Manager: Chris Tapia Department: Meter

**Project:** 2023100014 Funding Source: 100% Fund 110 – Water Replacement

Comments: VWD has the foundation of an AMI, Advanced Metering Infrastructure, system in place with 32% (7,343) of our existing radios capable of broadcasting an over-the-air meter reading to a fixed network antenna. This pilot would be a proof-of-concept, standing up a single network base antenna to collect nearby readings which are pushed to a Sensus hosted server. The first antenna is readily available for use in collaboration with OMWD. The ability to use their antenna allows for a reduction in FY22-23 costs from \$350,000 to \$150,000. VWD will have access to hourly interval readings through the Sensus Network as a Service which is provided during the pilot. Pilot program will proceed for one year, initially. At the end of the pilot, if we decide to move forward, we can explore the cost and effort associated with a full integration into our Billing system, NorthStar. The estimated cost for full implementation is approximately \$3,500,000. The full deployment can be done in phases as we seek grant funding to help supplement the cost through WaterSMART. A fully deployed AMI system will require at least 12 network base antennas strategically placed through our district. Full deployment will also required the remaining 68% (15,327) older radios currently in ground to be replaced with a newer version capable of hitting the AMI network. AMI is beneficial for our customers and for our district as we can have better water loss accountability. An AMI system can easily aggregate all retail meter sales and compare them against water purchased so we can monitor water loss throughout the system. Our customers will also have actionable data presented to them in a timely matter, currently drive-by reading system only provides one meter reading every ~30-days.

**Operations Impact:** Better water loss accountability & less drivetime for reads. More actionable data for the District and its customers. Will identify a meter "slowing" before it's dead.

# Capital Improvement Program Heli-Hydrant

**Description:** Installation of a Heli-Hydrant at the Twin Oaks Reservoir Facility.

Project Manager: Ed Pedrazzi Department: Operations and Maintenance

**Project:** 2023100015 Funding Source: 100% Fund 110 – Water Replacement

**Comments:** As the operator of the water system that provides fire suppression support for our customers through a network of water pipelines, the District plays an important role in the protection of life and property in our service area. With the ever-expanding range of fire season in our region, providing enhanced access to water for firefighting helicopters to protect the homes and properties of our customers is a crucial element of customer service. The Heli-Hydrant will transform the way fires are fought in North San Diego County by supplying a way to put water on fires sooner. Thus, reducing the negative impacts on life and property.

The Heli-Hydrant will supply firefighters with an added asset that can be used to protect the District's critical infrastructure such as pump stations, lift stations, and other remote facilities. This added asset may prevent the additional expenditure of replacing critical infrastructure if it were lost to fire.

Cost of the facility will be evenly split between the District and fire protection agencies.

**Operations Impact:** Routine Maintenance.

# Capital Improvement Program MRF: Circuit Breaker Program

**Description:** MRF: replace main circuit breaker, test and refurbish if possible.

Project Manager: Dean Toth

Department: Mechanical/Electrical

**Project:** 2023100016 Funding Source: 100% Fund 210 – Sewer Replacement

Comments: Large electrical circuit breakers should be inspected and serviced every three years. The Mechanical/Electrical Department is developing a circuit breaker maintenance program for all District facilities. This program will be on a three-year cycle. We will replace and test every circuit breaker that is 400 amps and above. This will be expensive for the first three years as we will need to buy replacement circuit breakers for each site. Each circuit breaker in this program will be removed and replaced with a new one. The old circuit breaker will then be sent out for testing and possible refurbishment. The refurbished breakers will be stored and available for use on the next cycle. This is a big undertaking that requires a substantial amount of planning. We will need to have a contractor perform this work at several of the sites to get the program started. This program is critical in order to maintain our facilities properly and meet current industry standards.

**Operations Impact:** Servicing the equipment in this program will help to insure a safe and reliable electrical system.

# **Capital Improvement Program Repairs and Coating of Concrete Yard Wall**

**Description:** Make repairs to the concrete yard wall and material bins. Paint and coat the District's concrete wall around the equipment yard and epoxy coat the materials bins.

Project Manager: Steve Klein Department: Maintenance Services

**Project:** 2023100017 **Funding Source:** 51% Fund 110 – Water Replacement 49% Fund 210 - Sewer Replacement

Comments: The concrete wall surrounding the District's equipment yard is in need of several repairs, painting and coating. The paint has failed in most areas and the exterior wall along Mission Road has been vandalized with graffiti several times. There are several sections of the wall that require the concrete to be repaired or replaced. After repairs have been made, the wall will be painted inside and out with an anti-graffiti coating applied to the exterior portion of the wall. This coating will allow District staff to remove the graffiti without needing to repaint the wall. The materials storage bins require sections of the concrete to be repaired or replaced due to the excessive wear from construction activities. The bins will be coated with a durable epoxy designed to withstand the aggressive nature of the work being performed on a daily basis.

**Operations Impact:** Improved aesthetics and extend the life of the asset.

### **Project Spending Plan**

# **Capital Improvement Program Coggan Pump Station: Facility Improvements**

**Description:** Remove chlorine building. Grade and pave entire facility with new asphalt.

Project Manager: Kevin Anctil

Department: Construction

**Project:** 2023100018 Funding Source: 100% Fund 110 – Water Replacement

**Comments:** The obsolete chlorine gas building at Coggan Pump Station will be removed. The building area will be graded and asphalt installed. The asphalt around the pump station is past its service life and needs to be replaced. The existing asphalt will be removed and replaced with new asphalt.

**Operations Impact:** Extend life of the asset.

# Capital Improvement Program District-wide Valve Replacement Program

**Description:** Replace broken or leaking valves throughout the District.

Project Manager: Kevin Anctil

Department: Construction

**Project:** 2023100019 Funding Source: 100% Fund 110 – Water Replacement

**Comments:** The valve crew has discovered many broken valves requiring replacement. This project is to replace several valves in the next fiscal year.

**Operations Impact:** Improved ability to isolate water mains with less impact to customers. Routine maintenance.

## **Project Spending Plan**

# Capital Improvement Program MRF - Replacement of South Influent Pump

**Description:** The south influent pump needs to be replaced.

Project Manager: Matt Wiese Department: Meadowlark Reclamation Facility

**Project:** 2023100020 Funding Source: 100% Fund 210 – Sewer Replacement

**Comments:** The South Influent Pump Station at the Meadowlark Water Reclamation Facility conveys all local flow from around the Meadowlark Facility to the headworks where it combines with sewer from other lift stations for treatment. Two of the three South Influent Pump Station pumps have been replaced. The last remaining old pump requires excessive maintenance to remain in operation and needs to be replaced. A reliable third pump for the South Influent Pump Station is necessary in order to provide reliable operation.

**Operations Impact:** Improved reliability of the South Influent Pump Station operation.

# **Capital Improvement Program Construction of IT Offices**

**Description:** Construction of two interior walls creating two new offices with new furniture.

Project Manager: Steve Klein Department: Maintenance Services

**Project:** 2023100021 Funding Source: 51% Fund 110 – Water Replacement

49% Fund 210 - Sewer Replacement

**Comments:** Two IT positions are currently staffed in cubicles, which do not allow for privacy while staff is working on confidential information. Two interior walls will be constructed to convert the existing cubicle areas into conventional offices. The two new offices will require new furniture to accommodate the changes.

Operations Impact: Improved privacy and security for IT staff. Some District staff will be impacted during construction.

# Capital Improvement Program Northstar – Server Migration and Upgrade to NS 6.6

**Description:** Required Software upgrade for the District's Customer Information System (NorthStar) is required to ensure continued vendor support for District maintenance systems.

NORTH|STAR™ UTILITIES SOLUTIONS

Project Manager: Matias Labarrere Department: Information Technology

49% Fund 210 - Sewer Replacement

**Comments:** Update Northstar CIS system from Version 6.4 to 6.6 and migrate application to new server. SQL Server 2012 and Windows Server 2012R2 will not be supported in mid to late 2022. NS Server will be upgraded to Windows Server 2019 and SQL Server 2019.

**Operations Impact:** Replacement of end-of-life software is necessary to ensure continuity of business operations.

### **Project Spending Plan**

# **Capital Improvement Program Boardroom: HVAC Repairs & Ceiling Replacement**

**Description:** Remove ceiling tiles in the boardroom and replace with new tiles. Replace broken VAV air controller while the ceiling is down.

Project Manager: Steve Klein **Department:** Maintenance Services

**Project:** 2023100023 **Funding Source:** 51% Fund 110 – Water Replacement

49% Fund 210 - Sewer Replacement

Comments: The Variable Air Volume controller (VAV) modulates the air flow from the Heating, Ventilation, and Air Conditioning (HVAC) system that keeps a room at the desired temperature. The gears in the VAV for the boardroom are inoperable and only allowing cold air into the room. The repair cannot be completed without removing the ceiling tiles. The ceiling tiles in the boardroom are no longer manufactured or available to purchase. There are several tiles damaged or missing and need to be replaced. This project will include the repair of the air controller and replacement of the ceiling tiles at the same time.

**Operations Impact:** The boardroom will not be available during construction.

### **Project Spending Plan**

# Capital Improvement Program Primary Clarifier Sludge Pump Replacement

**Description:** Primary clarifier sludge pump replacements for the Meadowlark Water Reclamation Facility.

Project Manager: Matt Wiese Department: Meadowlark Reclamation Facility

**Project:** 2023100024 Funding Source: 100% Fund 210 – Sewer Replacement

**Comments:** The primary clarifier sludge pumps are in need of replacement. They are currently unable to handle the solids loading of the primary clarifiers as the rags and other debris get lodged between the shaft and motor stator. Rebuild and replacement parts are hard to obtain, requiring the maintenance department to pull parts from other pumps to complete one working pump. Removing solids from the primary clarifier is an essential part of wastewater treatment.

**Operations Impact:** Less maintenance time and resources spent on maintaining the primary sludge pumps.

### **Project Spending Plan**

# **Capital Improvement Program Repairs and Painting of the Warehouse**

**Description:** Repairs, painting and coating of the District's warehouse building.

Project Manager: Steve Klein Department: Maintenance Services

**Project:** 2023100025 **Funding Source:** 51% Fund 110 – Water Replacement 49% Fund 210 - Sewer Replacement

Comments: The District's warehouse building is over two decades old and is in need of repairs, painting and coating. The paint is failing in several areas and the exterior wall along Mission Road has been vandalized with graffiti several times. The large, steel roll-up doors need to be repaired prior to painting. The base of the exterior walls around the warehouse needs to be repaired in a few areas and the sealing replaced prior to any painting. This seal prevents further water damage to the base of the warehouse wall. After repairs have been made, the entire building will be painted, and an anti-graffiti coating applied to the exterior portion of the wall along Mission Road. This coating will allow District staff to remove the graffiti without needing to repaint the wall.

**Operations Impact:** Improved aesthetics and extend the life of the asset.

### **Project Spending Plan**

# Capital Improvement Program Wulff Pump Station: Circuit Breaker Program

**Description:** Wulff Pump Station: replace main circuit breaker, test and refurbish if possible.

Project Manager: Dean Toth

Department: Mechanical/Electrical

**Project:** 2023100026 Funding Source: 100% Fund 110 – Water Replacement

Comments: Large electrical circuit breakers should be inspected and serviced every three years. The Mechanical/Electrical Department is developing a circuit breaker maintenance program for all District facilities. This program will be on a three-year cycle. We will replace and test every circuit breaker that is 400 amps and above. This will be expensive for the first three years as we will need to buy replacement circuit breakers for each site. Each circuit breaker in this program will be removed and replaced with a new one. The old circuit breaker will then be sent out for testing and possible refurbishment. The refurbished breakers will be stored and available for use on the next cycle. This is a big undertaking that requires a substantial amount of planning. We will need to have a contractor perform this work at several of the sites to get the program started. This program is critical in order to maintain our facilities properly and meet current industry standards.

**Operations Impact:** Servicing the equipment in this program will help to insure a safe and reliable electrical system.

# Capital Improvement Program Twin Oaks Reservoir: Asphalt Repair & Sealcoat

**Description:** Repair asphalt and sealcoat at the Twin Oaks Reservoir Facility.

Project Manager: Kevin Anctil

Department: Construction

**Project:** 2023100028 Funding Source: 100% Fund 110 – Water Replacement

**Comments:** The Construction department needs to repair some damaged areas and sealcoat the asphalt at the Twin Oaks Reservoir Facility, including its access road. The asphalt has cracks, root damage, and potholes. Once the asphalt patching is complete, the area will be seal-coated to extend the life of the asphalt.

**Operations Impact:** Extend life of the asset.

# **Capital Improvement Program GEMS – Upgrade to ABSuite 7.0**

**Description:** A required Software upgrade to the District's Financial Information System (GEMS) is necessary to ensure continued vendor support for District Financial systems.

Project Manager: Matias Labarrere Department: Information Technology

**Project:** 2023100029 Funding Source: 51% Fund 110 – Water Replacement

49% Fund 210 - Sewer Replacement

**Comments:** THE GEMS application runs on the AB Suite 6.1 Unisys platform. The platform reaches end-of-life in July 2022. Harris ERP will continue to provide support for the GEMS application until VWD upgrades to AB Suite 7.0 during FY 22/23. Harris ERP will also release the service pack for tax year 2022 if VWD has not upgraded to AB Suite 7.0 by December 2022.

**Operations Impact:** Replacement of end-of-life software is necessary to ensure continuity of business operations.

### **Project Spending Plan**

# Capital Improvement Program South Lake Pump Station: Asphalt Repair & Sealcoat

**Description:** Install new asphalt, make repairs to existing and then sealcoat at the South Lake Pump Station.

Project Manager: Kevin Anctil Department: Construction

**Project:** 2023100030 Fund 110 – Water Replacement

**Comments:** We need to extend the existing asphalt area at the pump station and install a berm to prevent erosion. There are some damaged areas that need to be repaired. We will then sealcoat all the asphalt at the South Lake Pump Station to extend the life of this asset.

**Operations Impact:** Extend life of the asset.

# Capital Improvement Program Manhole and RAS Valve Box Rehabilitation

**Description:** The manholes and RAS telescoping valve boxes are in need of rehabilitation.

Project Manager: Matt Wiese Department: Meadowlark Reclamation Facility

**Project:** 2023100031 Funding Source: 100% Fund 210 – Sewer Replacement

**Comments:** The manholes and Return Activated Sludge (RAS) telescoping boxes at the Meadowlark Reclamation Facility are in need of rehabilitation. There is aggregate exposed in some of the manholes and all of the RAS telescoping boxes. This is due to the constant water flow combined with the high levels of H2S in these enclosed areas. If left untreated, the manholes and RAS telescoping boxes will continue to deteriorate. MRF plans to have a specialist place a coating inside the manholes and RAS telescoping boxes that will resist the harsh conditions.

**Operations Impact:** The concrete manholes and valve boxes will no longer deteriorate, extending the life of the assets.

# **Capital Improvement Program Service Line Replacement & Meter Relocations**

**Description:** Replace two water service lines and relocate the water meters to the District's right of way.

Project Manager: Kevin Anctil

Department: Construction

**Project:** 2023100032 Funding Source: 100% Fund 110 – Water Replacement

**Comments:** The meters installed at 1105 La Bonita and 1750 San Pablo Drive in the Lake San Marcos community are located outside of the District's right of way. A new 2" service line will be installed from the water main to the District's right of way and the water meter will be relocated to meet District standards at both locations.

**Operations Impact:** None

# Capital Improvement Program MRF Aeration Basin Compressor - Redundant System

**Description:** A redundant air compressor for the aeration basins is needed in case of failure or prolonged maintenance.

Project Manager: Matt Wiese Department: Meadowlark Reclamation Facility

Project: 2023100033 Funding Source: 100% Fund 250 - Reclaimed

**Comments:** The aeration basins for the Meadowlark Reclamation Facility are in need of a backup compressor for the mixing of the anaerobic selector zone. Currently, there is no redundancy for the air compressor system. The proper operation of the anaerobic selector zone is essential for maintaining water quality and regulatory compliance. Even though the current compressor is new, there have been constant reliability issues. When the compressor fails, the plant water quality begins to decline within hours. There is currently no backup system if prolonged maintenance needs to be performed on the compressor. Minimal modifications would need to be made in order to install a backup air compressor system.

**Operations Impact:** Redundancy for the mixing of the anaerobic mixing zone.

# **Capital Improvement Program Replacement of District Radio Repeater**

**Description:** Replace the District's radio repeater and associated components.

Project Manager: Dean Toth

Department: Mechanical/Electrical

**Project:** 2023100034 **Funding Source:** 50% Fund 110 – Water Replacement 50% Fund 210 – Sewer Replacement

**Comments:** The District's radio repeater was inspected in 2021. The inspection results indicated that the repeater is showing signs of severe signal degradation. Currently, communications are online but transmission power is at 20% of its programmed value. We are unable to adjust or tune the radio to fix this issue. No repair parts are available as the repeater is antiquated and lost repair support several years ago. It is recommended that this repeater and its associated components be replaced in order to maintain the District's radio communications.

**Operations Impact:** Improved radio communications and reliability. Routine maintenance.

# **Capital Improvement Program Electronic Signature Initiative for District Docs**

**Description:** Implementation of an electronic signature solution to increase the efficiency of the document signing process. \*\*Please note that this initiative will likely require a resolution by the Board of Directors to Authorize Use Digital Signatures as allowed by State law\*\*

Project Manager: Matias Labarrere Department: Information Technology

49% Fund 210 - Sewer Replacement

Comments: \*\*Subscription\*\*DocuSign, Inc., offers an electronic platform (eSignature) that allows users to transact business digitally anytime, anywhere, on any device, in a manner that is secure, legal, and easy to use. Replacing paper-intensive processes and allowing staff, constituents, vendors, and members of the public to conduct business through their Personal Computers (PC) or mobile devices will speed up the time it takes to provide services by providing faster turnaround times for execution of signed documents. DocuSign works with existing forms and documents, conforms to existing workflows and approval processes, and is delivered through a secure and scalable cloud platform. The software also integrates with back-end systems, such as the District's Laserfiche Document Management System. DocuSign can provide greater visibility into who has and has not signed documents, and automatically stores documents for retention and archival within DocuSign's server or behind the District's firewall. DocuSign's native apps for iOS, Android, and Windows 10 allows anyone to sign on their smartphone or tablet. The software also supports in-person signing using mobile devices, enabling the District to use electronic signatures even when staff are in the office.

**Operations Impact:** Increased efficiency of the document signing process

# **Capital Improvement Program Schoolhouse Tank: Safety Nets and Climbing Systems**

**Description:** Installation of SRLs and safety nets at Schoolhouse Tank.

Project Manager: Shawn Askine Department: Water Operations

**Project:** 2023100037 Funding Source: 100% Fund 110 – Water Replacement

**Comments:** We have been upgrading our vaults throughout the District to meet OSHA compliance by installing Self-Retrieving Lines (SRLs) and safety nets. We are using the same standard on all of our vaults to maintain uniformity for its users and for ease of maintenance.

**Operations Impact:** OSHA compliance and safety for our staff.

# Capital Improvement Program Mahr Reservoir Road: Asphalt Repair & Sealcoat

**Description:** Repair asphalt and sealcoat Mahr Reservoir Road.

Project Manager: Kevin Anctil

Department: Construction

Project: 2023100039 Funding Source: 100% Fund 250 - Reclaimed

**Comments:** We need to repair some damaged areas and sealcoat the asphalt for Mahr Reservoir Road. The asphalt has several cracks and potholes. The asphalt patches will be completed and then the area will be sealcoated to extend the life of the asphalt.

**Operations Impact:** Extend life of the asset.

Days of Operating Expenses in Unrestricted Cash at	nd Inves	stments								581

<sup>(1)</sup> The District issued Refunding Revenue Bonds on July 1, 2015, to prepay a portion of the previously outstanding COPS Series 2005A. The bonds have a 5% interest rate over the 20-year term.

<sup>(2)</sup> The 21/22 principal payment on the refunding bonds is due to bondholders on July 1, 2022. The District is obligated to transfer the payment before June 30, 2022, to a restricted account maintained by the Trustee, and, therefore, was deducted from the projected July 1, 2022 balance presented in the Reserve Budget.

<sup>(3)</sup> The District and Union Bank of California executed an \$8 million 20-Year tax-exempt private placement with variable rate interest tied to the LIBOR. The District has the option of changing the LIBOR term. The current term is six months. The current rate is 1.49971%. The proceeds partially restored a deficit balance in the restricted wastewater capacity fund from cash funding construction of the Encina Wastewater Authority Phase V expansion.

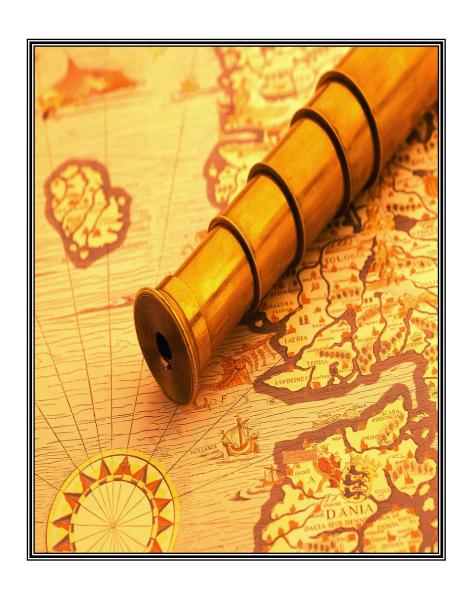

<sup>&</sup>lt;sup>(4)</sup> The District issued bonds on December 21, 2012, to fund the increased capacity portions of San Marcos Interceptor and Linda Vista Sewer projects. The bonds have a 1.98% interest rate over the 10-year term.

<sup>(5)</sup> The District issued bonds on August 19, 2021 to fund capital projects in the amount of \$28 million. A portion of the proceeds was used to fund replacement projects and subsequently transferred to the capacity fund along with the responsibility for the debt service. The bonds were issued at a total all-in cost of 2.24% over a 30-year term.

<sup>(6)</sup> Per the 2015 Refunding Revenue Bonds official statement, the District is required to maintain a debt service coverage ratio of 1.15. Debt service coverage ratios are presented above inclusive and exclusive of capital facilities fees to demonstrate the District's ability to cover debt service above the required minimum. Capital facility fees are included in the official statement's definition of "Net Revenues".

### Significant Assumptions

**Operating Transfers** - the result of operating activity transferred from the disbursements fund during the year. Operating transfers from FY 2027 through 2032 will increase by 2%.

Rates - For budget purposes combined water and sewer rates for the average single family resident are expected to increase approximately 3.5% to 4.0% January 1, 2023 pending results from the San Diego County Water Authority rate increases and are estimated to increase by approximately 3.5% to 4.0% January 1, 2024 and beyond.

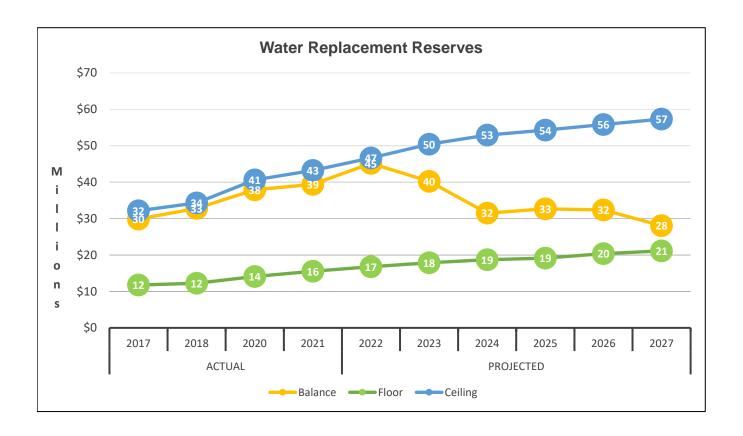

*Operating Expense Assumptions* - Over the next five years, cost of wholesale water commodity will increase by approximately 25% and wholesale fixed charges will increase by approximately 24%. Power, fuel, and chemical costs will increase by 4.5% per year, while most other operating costs will increase by 2% from year-to-year on average. The District will add 100 to 120 water accounts in 2022/23, and 100 to 120 in 2023/24 and every year thereafter. The District will add 100 to 120 sewer accounts in 2022/23 and approximately 100 to 120 in 2023/24 and each year thereafter.

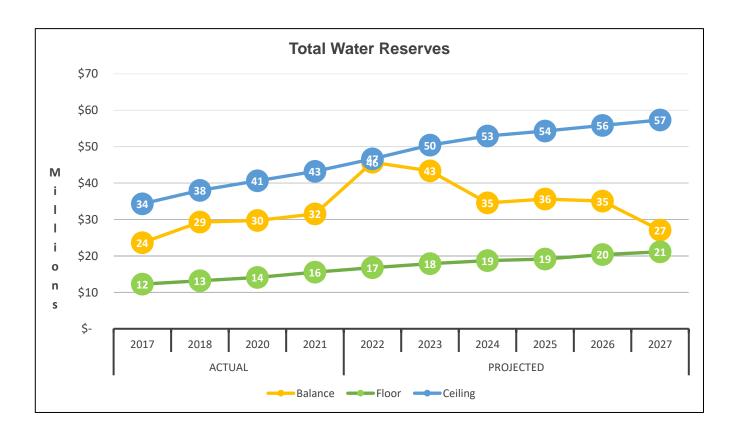

Capital Facility Fees – The District will collect capacity charges for 275 water EDUs in fiscal year 2022/23 and between 225 and 300 EDUs in each fiscal year, 2023/24 through 2026/27. The District will collect capacity charges for 325 sewer EDUs in 2022/23 and between 300 and 375 sewer EDUs from 2023/24 through 2026/27. The rate per EDU will increase by the ENR each year.

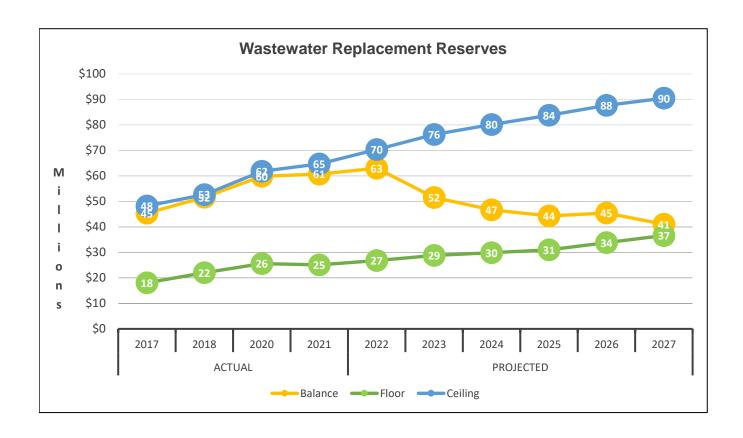

Property Tax - revenue from the 1% allocation will increase by 2.15% each year.

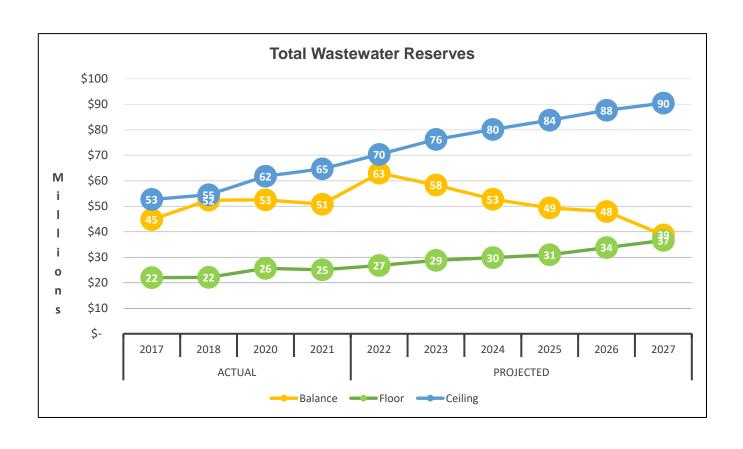

Investment Earnings - assumed at 0.94%.

Capital Outlay scheduled after Fiscal Year 2027 will be expended evenly over six years.

# Vallecitos Water District Replacement Reserve Limits - Water System For the 2022-23 Budget year
