** This is the base fee only for each meter size. Water Capital facility fees are determined according to Ordinance Nos. 226. Water meter size shall be based on the estimated average monthly demand in gallons per day (GPD) provided by the applicant on the Water Meter Demand Form. Estimated peak demands shall not exceed the gallons per minute (GPM) listed on the District's Water and Wastewater Capital Facility Fee Schedule for the meter size proposed. Extra capacity may be required in addition to the base capital facility fee and is calculated on a per gallon basis. Water meters over 4" are restricted to fire service purposes unless request is submitted to the Board of Directors for consideration. Equal to \$20.07 per Gallon Per Day (GPD).

WASTEWATER CAPITAL FACILITY FEES EFFECTIVE AUGUST 18, 2024		
Single Family Residence	250 gpd	\$ 20,059.00
Mobile Home (each unit)	200 gpd	\$ 16,048.00
Mixed Use (each unit)	180 gpd	\$ 14,443.00

Equal to \$80.24 per Gallon Per Day (GPD).

Wastewater Capital Facility fees are determined by Ordinance No. 226.

Multi Family residential fees could be calculated using the Water & Wastewater Study and Land Use Categories in the 2018 Master Plan or based on Water Meter Demand Form; whichever is higher.

Non Residential fees are based on land use and/or actual flow capacity as determined by District review.

These fees do not include inspection by a VWD inspector or installation by a private contractor.
